Results of any additional sampling and/or analysis that was requested by an Inspector

No additional sampling requested by an Inspector or the Board	•
Additional Details: (date of request, analysis of results, data attached, etc)	

Any other details on water use or waste disposal requested by the Board by November 1 of the year being reported.

No additional sampling requested by an Inspector or the Board
Additional Details: (Attached or provided below)

Any responses or follow-up actions on inspection/compliance reports

No inspection and/or compliance	e report issued by INAC	-

Additional Details: (Dates of Report, Follow-up by the Licensee)	

Any additional comments or information for the Board to consider

5050 Nunavut Ltd. obtained an Environmental Assessment report on McGregor Lake camp through its environmental consultant (Rescan Environmental). The report indicated presence of 760 fuel drums, 1000 m3 of hydrocarbon impacted soil, and 575 m3 metals impacted soil. This environmental liability is left over by the previous operators at the camp. In our opinion the Ni & Cr (metals) soil anomalies may be due to natural background.
