Re: Application exempt from Screening pursuant to Section 12.4.3 of the NLCA: Agnico Eagle Mines Limited's "Baseline Environmental Studies in Support of Meliadine Gold Project"

Dear Mosha Cote:

On March 1, 2011 the Nunavut Impact Review Board (NIRB or Board) received an application from Nunavut Research Institute (NRI) for a renewal to a Scientific Research Licence for Agnico Eagle Mines Limited's (AEM) "Baseline Environmental Studies in Support of Meliadine Gold Project" project proposal.

Please be advised that the original project proposal (NIRB File No.: 08YN047) was received by the NIRB from NRI on April 16, 2008 and was screened by the Board in accordance with Part 4, Article 12 of the Nunavut Land Claims Agreement (NLCA). On May 22, 2008 the NIRB issued the enclosed NLCA 12.4.4(a) screening decision to the Minister Responsible for the Nunavut Arctic College indicating the proposed project could proceed subject to the NIRB's recommended project-specific terms and conditions.

On March 27, 2009 the NIRB received an application from NRI for a one year renewal to the Scientific Research Licence for this project. After a thorough assessment of the renewal request, the NIRB determined that the application was exempt from further screening as per Section 12.4.3 of the NLCA, and reissued the enclosed screening decision report on April 22, 2009.

The current NRI application, the original NIRB Screening Decision Report (NIRB File No. 08YN047) and related file information are available from the NIRB's ftp site at the following

link: <http://ftp.nirb.ca/01-SCREENINGS/COMPLETED%20SCREENINGS/2008/08YN047-Lasha%20Young/>

PREVIOUSLY-SCREENED PROJECT PROPOSAL:

As previously screened by the NIRB (File No. 08YN047), the “Baseline Environmental Studies in support of Comaplex Minerals Corporation – Meliadine West Gold Project, Kivalliq” project was located within the Kivalliq region, approximately 24 kilometres (km) northwest of Rankin Inlet. (Comaplex Minerals Corporation is now Agnico Eagle Mines Limited and the Meliadine West Gold Project is now the Meliadine Gold Project.)

The Proponent planned to collect the following baseline environmental data along the proposed all-weather road from Rankin Inlet to the project site:

- Collect wildlife data and document wildlife habitat;
- Aerial surveys for caribou (~six per year);
- Aerial caribou trail survey;
- Aerial survey for waterfowl;
- Upland songbirds and shorebirds survey;
- Aerial surveys for raptors;
- Vegetation field surveys: vegetation inventory to delineate the common plant communities and a helicopter fly to confirm interpretation of satellite imagery;
- Rare plant surveys and identify rare plant potential;
- Aquatic field surveys: detailed habitat mapping to describe and quantify fish habitat; watercourse crossing studies to identify and verify potential Arctic grayling spawning sites;
- Water quality and sediment quality surveys;
- Snowcourse survey and hydrometric monitoring; and
- Heritage resources survey.

CURRENT APPLICATION:

AEM is proposing to renew its Scientific Research Licence for an additional year to collect sufficient information to characterize the areas which may potentially be impacted by the future development of a mine.

Please note that Section 12.4.3 of the NLCA states that:

“Any application for a component or activity of a project proposal that has been permitted to proceed in accordance with these provisions shall be exempt from the requirement for screening by NIRB unless:

(a) such component or activity was not part of the original project proposal; or

(b) its inclusion would significantly modify the project.”

After completing a review of the information provided in support of the current application, the NIRB is of the understanding that the proposed renewal does not change the general scope of the original project activities, and the exceptions noted in NLCA 12.4.3(a) and (b) do not apply. Therefore, this application is exempt from screening as per Section 12.4.3 of the NLCA and the activities therein remain subject to the terms and conditions recommended in the original May 22, 2008 Screening Decision Report (enclosed).

If you have any questions or require clarification, please contact Kelli Gillard, Technical Advisor at (867) 983-4619 or kgillard@nirb.ca.

Sincerely,

A handwritten signature in black ink that reads "Ryan Barry". The signature is written in a cursive style and is followed by a horizontal line that extends to the right.
