Subject: 2BE-MEP0813: Camp to be added to amendment request
Date: Tuesday, June 28, 2011 7:38:42 AM

Phyllis...on the 24th of October 2010, Agnico-Eagle Mines Limited applied to increase its water use for the above noted Water Licence from 30 m³/day to 299 m³/day. In its original application, AEM indicated there would not be a camp associated with this amendment request. Upon reflection AEM has decided it needs a camp included but not at its original location on Atulik Lake; it will be located elsewhere.

If the NWB finishes the original amendment, AEM would immediately ask for another for the camp, if that is necessary. Should I update the original application with the new camp location?

I look forward to your advice.

Sorry for this late change.

Regards
John
