Dear Mr. Dwyer,

I would like to inform the Nunavut Water Board that due to the economic circumstances, UNOR Inc. has gone through a difficult period of adjustment and re-organization, and as a result it was only a few days ago that we became aware of the requirement for and Addendum to the Mouse Lake Project Spill Contingency Plan (Part H Item 2 of licence 2BE-MOU0914). I will try my best to find the appropriate information requested for this Addendum. Please note that due to the current economic situation, UNOR Inc. is not planning to open the camp for the summer exploration season this year.

Sincerely Yours,

Bogdan Nitescu, PhD
