Hello Richard,

I just received the attached answer from Tommy Owljoot that our project is outside the NPC active area. I'll now get back at preparing the supporting documents for the License renewal request.

Regards

David

Ref: Mouse Lake Project – INAC file N2006C0001; NWB file 2BE-MOU0608; NIRB file 06NE009

Dear Mr. Aglukark,

On November 5th I sent emails to yourself and Tommy Owljoot enquiring about the procedure to obtain Nunavut Panning Commission conformity for the Mouse Lake Project. The Nunavut Water Board has requested that the NPC approval of the project be submitted as part of the documentation to support a request for renewal of License 2BE-MOU0608. I have been unable to access the web sites for the Nunavut Planner and NPC to verify the required procedures.

The Mouse Lake uranium exploration project is located about 80 kilometers south of Kugluktuk in the Kitikmeot region. At the time of our submission to NIRB in 2006, I do not believe that there was a detailed plan in place for the area of the project.

Please advise me of the recommended course of action to follow in order to proceed with the request for an extension of the License.

Regards,

David Bent
V. P. Exploration UNOR Inc.
