Hi Jim,

I'm reviewing your file again, and it seems to me that item 3 below would be best carried out after the snow melts and ground starts to thaw a bit. To facilitate matters, please consider all items on-site (Items 1-7) extended to **July 15, 2015**. Item 8 remains as per below.

As an additional request, in order to keep my files current for your project, I would ask that you fill out the attached form. The form has been significantly modified from the 2014 version, so please do not copy from last year's form.

To avoid duplication (as you may receive this also from Baba Pedersen, the Resource Management Officer for the Kitikmeot), please simply copy the completed form to myself, Baba (Baba.Pedersen@aandc-aadnc.gc.ca), and our Lands division at landsmining@aandc-aadnc.gc.ca. This will allow us to keep all of our files consistent.

Please submit the completed Project Assessment form by February 27, 2015.

Best regards,

Eva Paul

Hello Jim,

Thank you for your call and your letter. In response to your request for extension, the requirements and deadlines will be amended as follows:

1. Removal of expired fuels from all fuel caches, and any other hazardous waste on-site.
2. Drill salt is to be moved into water- and weather-proof containment or removed from site.

3. A cleanup of the drill/cache site (B), and removal of the heavily salt-contaminated soil to prevent further spreading. Backfill the hole with clean material. The spill and waste disposal measures are to be documented and reported as per the Spill Contingency Plan.
 4. Removal of all materials stored within 31m of the high water mark of Mouse Lake.
 5. Fuel may be stored at the main camp *in a quantity that would be consumed within a year (including the anticipated exploration program)*. This is to be maintained in covered secondary containment and monitored on a regular basis.
 6. Items 1-5 are to be carried out by **May 31 2015** and a report with photos of the completed work submitted to the Inspector by **June 15 2015**.
 7. Camp heating oil system is to be made compliant with the LUP. At a minimum, secondary containment or double-walled tanks are to be incorporated, and the system should be drained when not in use. This work is to be undertaken by **July 15, 2015**.
 8. The Spill Contingency Plan, and Abandonment and Restoration Plan are to be modified to include preventive measures for the heating fuel system (for temporary shut-down and preventing spills). These Addenda are to be submitted by **March 31, 2015 with the 2014 Annual Report**.
- Best regards,

Eva Paul

Hello Ms. Paul. Further to your telephone conversation with Jim yesterday, here is his letter as promised.

Regards,

Bev Brady
