Please include any information that was not captured above.

Re. Section C – Drilling activity in 2015: Proposed drilling in 2015 depends on securing necessary funds and / or finding a Joint Venture partner to fund exploration.

Re. Section D – Secondary containment subsection: the barrels in the camp cache (approx. 265 barrels) are in covered secondary containment

Re. Section D – Monitoring subsection: monitoring occurs during the yearly seasonal activity
Re. Section F – Reporting: For the year 2014 a letter will be sent to NWB in lieu of a report, informing about the lack of activity at the camp (there is no data to report since there was no exploration activity

and the camp was not opened in 2014).
