Hello

I am the Technical Advisor working on this file. And I need some clarification on this point:

The Remote Camp Supplementary Questionnaire filled on 2009 by David Bent, UNOR Inc. states that your drilling activities are land based and the Company is not drilling on ice. However, I can see the NIRB Certificate where there are conditions for drilling on ice.

Could you clarify whether drilling on ice is part of the regular drilling activities for this project or not?

Regards,  
Sonia Aredes

Hello Sonia.

The Company project contains drilling plans only for land-based drilling. The current water licence does not authorize on-ice drilling according to Part F Item 7, and we have applied for a renewal of the licence since the scope and characteristics of the project have not changed.

As you have observed correctly, the NIRB has included in its project screening terms regarding on-ice drilling, but, as I previously mentioned the Company is not authorized and does not have plans for on-ice drilling.

Respectfully,  
Bogdan Nitescu, PhD, PGeo  
Geologist and Geophysicist  
Hornby Bay Mineral Exploration Ltd.
