**Re: North Arrow Minerals Inc. - Mel Project Proposal (NWB Application No. 2BE-MPP----**

To whom it may concern,

We appreciate the opportunity to address the comments received by the NWB and provide some additional clarity on the scope and timing of the proposed activities. We have organized our responses to match the five general headings outlined in the review letter from Indigenous and Northern Affairs Canada dated March 21<sup>st</sup>, 2017 (INAC File No. 1137723).

**1. Quantity of water use**

It is unknown at this time which method of drilling will be conducted. It would therefore be wise to permit for the maximum allowable daily amount, based on the proposed activities [0.5(camp) + 50(drilling) = 50.5 m<sup>3</sup>/day]].

**2. Drilling from water or ice**

It is unknown at this time when or if work will be conducted. Project timing is predicated on resources, logistics and weather, and it is therefore impractical to submit a definitive schedule for the proposed land use activities to the NWB at this time. North Arrow agrees to provide plenty of notice to the NWB once the schedule and timing of work programs are known.

**3. Annual updates to management plans**

North Arrow agrees to re-visit approved management plans for the Mel Project yearly, and provide comments to the NWB in Annual Reports when necessary.

#### **4. Hazardous Waste**

North Arrow does not anticipate that hazardous materials will be generated during the land use activities proposed. However, should hazardous waste (i.e. bad fuel, used engine oil) be generated, it will be containerized, properly sealed and labelled, and then transported to an approved facility for proper disposal.

#### **5. Water Licence term**

North Arrow agrees that the term of the licence should be properly dated to reflect the coming-into-force and expiry dates.

Should you have any questions or comments regarding this submission, please contact the undersigned at your convenience.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mike MacMorran', with a stylized flourish extending to the right.
