May 12, 2021	11:28 PT		Arviq HTO, Dolly Mablik, Manager	thank you.
May 13, 2021	16:00 PT		Naujaat, Co-op Boardroom, Arviq HTO, In	Denise (DL) provided an introduction to the company, and outlined their proposed program. She asked for questions and suggestions. Question (Q): the Mel camp is located in the caribou calving ground area. People hunt there in the summer and there are local hires? Will you hire a wildlife monitor? DL: yes, the company would like to hire a wildlife monitor from Naujaat to keep the two crews safe and the

There would be no low level flights except for the case of an emergency.</p> <p>Q: have you talked with the Hall Beach HTO?</p> <p>DL: Yes, information has been sent to the Hall Beach HTO, and there were plans to go there until the COV changed that. You are not allowed to travel through Iqaluit to get to Hall Beach right now. A meeting would be safe to do so.</p> <p>Q: Based out of the Mel Camp? Is it open now? How many people would there be? Would the helicopter be used? Would there also be a wildlife monitor from the Hall Beach HTO? They use the area more than Repulse Bay.</p> <p>DL: Yes, all activities would be based out of the Mel camp. There would be about six people plus two wildlife monitors. One would be hired from Naujaat, and one from Hall Beach. They would carry a gun and be responsible for keeping each other and exploration crews safe, and would have the authority to shut down the helicopter if caribou or other wildlife were in the area. They made an agreement with NAR to use the camp, and explore on their ground, but not for diamonds.</p> <p>(people looked at the maps and talked amongst themselves).</p> <p>Kevin, the Hamlet SAO, stated that if the company was coming to Naujaat, that they would have to get permission from the HTO. They would have to follow all of the Chief Public Health Officers guidance.</p> <p>DL: absolutely, only planned on sending a helicopter to Naujaat in order to pick up the Wildlife Monitor, and the Company would be in the community.</p> <p>Group asked DL to leave the meeting to that they could talk amongst themselves.</p> <p>Group asked Denise to come back and stated that they supported the program and would provide a Letter of Intent.</p>
May 31, 2021	13:53	Hall Beach HTA, Hamlet SAO, QIA CLO, QIA Lands	<p>Email to, from DL re: Hello:</p> <p>I am working with StrategX Elements Corp who would like to conduct early stage mineral exploration in the area of Arrow's Mel camp later this summer. Is it possible to meet with the HTO regarding RE-26 and RE 27 in your community? I met with the Naujaat HTO in May and they asked that I meet with the Sarinajak HTO.</p> <p>I expect to arrive on July 21 after isolating myself in Ottawa for fourteen days. I will have had both COVID-19 vaccinations by later this week.</p> <p>In addition, I understand that the QIA CLARC met to discuss the O and N Projects last month. I would like to come on July 22 or 23 to answer any of your questions and concerns at that time.</p> <p>I have attached a better translated summary to explain what it is that StrategX Elements would like to do.</p> <p>As I said, I would like to come to Sarinajak to meet with you. Can you please provide me with a letter of intent to come so that I may begin the application process with the Chief Public Health Officer.</p>

July 6, 2021	09:30 local time		QIA Lands Manager, Joe Fortier, Iqaluit	Meeting with DL to discuss application and Sanirajak's concerns
July 7, 2021	15:30 local time		Sanirajak: In Attendance: StrategX Elements Corp: Denise Lockett QIA: Abraham Qammaniq (QIA Director), Lou Nattuk, Ike Angotautok,	Denise (DL) thanked everyone for coming to the meeting and explained that she had tried to come in May, but with the pandemic she was not allowed to fly through Iqaluit to get to Sanirajak. This was the soonest that she was able to come back to the area. She outlined the project and said that she was aware that the QIA CLARC had met by phone, and she wanted to come to the meeting with them face-to-face so that she could answer their questions, talk about their concerns, and hopefully find a way forward for the project. Jopie (elder): Who are you working for? StrategX? DL: yes, StrategX. Jobie: I am concerned as a hunter. The camp is too close to the hunting area. There is an impact because of the helicopter. There have been a lot of complaints before because of the helicopter. Its being investigated by the QIA. The hunters had a lot of complaints about the flying helicopters. DL: Explained that she was not aware of any complaints to North Arrow about their helicopter activity. Was this recent? She wasn't aware of any helicopters since North Arrow was exploring in 2018. Explained that StrategX proposed being based in the area, flying 3 flights out of camp and 3 flights back into camp daily. There would be no low-level flights and that the Wildlife Board, Naujaat and Sanirajak would have the full authority to shut down the helicopter if wildlife were in the area. Abraham: re 26 and 27 are in the calving area. Should not be in the area in August during the calving time. We met as a committee to make a motion, and another motion to the Nunavut Wildlife Board to reduce hunting in the area. People from Iglulik, Pond Inlet

			<p>Jopie Kaernerker, Laimiki Ulluapak HTA: Deborah Qamatsiaq, Paul Nagmalik, Sam Arnardjuaq ? Lillah Piiallaq, Laimiki Ullupak</p>	<p>south to hunt in this area. Over 500 caribou have been harvested in the past. There are caribou hunts in RE 26/67 all w camp in area (shown on a map South of Hall Beach in an inlet) DL: could there be an alternate time that the company could conduct exploration activities for two weeks with min Abraham: if you find something, then activity will increase and there will be more impact. DL: if they do not find anything, they do not come back. Work together to find a way to work with minimal impact. Abraham: we passed a motion not to support the project. In the past, there was activity in the hunting area with the area being over-hunted. Way too much activity in the area around the Mel camp, this is the migration route and th DL: Need a two-week window where there is less activity to impact. Wildlife Monitors would have absolute author We would work together to mitigate any impact from the helicopters. Not a lot of flights = 6 per day. Deborah: We passed a motion to not support (asked for a copy), no mitigation measures will be enough. There h because of the low-level flights on the Fall hunt. Motion from the HTA that the project does not proceed. Jopie: when this first happened (notice of StrategX request), you went to Naujaat first and Sanirajak was second. We DL: Sorry and that was my fault. I was not allowed to come because of the COVID outbreak in Iqaluit, I wasn't allow community of the project. Made sure you were aware and prepared before this visit. Came back as soon as I could. Deborah: you cannot monitor and mitigate because there are caribou there all the time. We already decided an support the Project. Even in helicopters were 200 km away, the caribou would hear them. There is no mitigation if heli</p> <p>Meeting over. Thanks for coming. Appreciate information and advice.</p>
July 8, 2021	13:30 local time		<p>Deborah Qamatsiaq (Baffinland CLO), HTA Director</p>	<p>DL: thanked her for the meeting yesterday. Unfortunately, not able to reach anyone from QIA CLARC or HTA to talk Wanted to ask some further questions and seek clarification Deborah: did not understand that RE26/26 where in the Kivalliq Region, not Qikitan Region. Explained on map w from Iglulik, Pond Inlet and Arctic Bay travel south to this area to hunt. They travel by boat and hunt from along the sho to be more along the shore but now has moved further inland – more towards the HB-01 boarder. Mel camp is in the w barrier to caribou migration. Said that an elder would never have picked that area. Said that the camp should have bee DL said that hearing that the Mel camp was in the wrong spot was unfortunate as they company had asked the HTO to help them choose an appropriate site. Sanirajak people hunt south of Hall Beach along the south shore of the inlet south of Hall Beach and Hall Lake. No prob as no one hunt in those areas. The community has polar bear tags, but they seldom use them. Talk about the company using quads but explained that they would still have to be helicoptered in in order to use them wouldn't be allowed to use quads as they impact the tundra. Exploration now allowed to do that. Discussed how much (\$1500. For a week on the land). Discussed how exploration company helicopters have helped with search and rescues for people to have "in-reach" subscriptions. Search and Rescue has a few "spots" that they loan out, but they never cor Rescue. Asked if helicopters flew every other day instead of every day, but Deborah did not see that as a possibility. End of meeting. Went to HTA office down the hall and Julie was working and said she knew of the request for the motio asap</p>

The monitor would stay at the North Arrow's Mel camp that StrategX Elements Corp is allowed to base their operations. They would fly by helicopter each day to the exploration sites with the exploration crew and determine wildlife activities, (if wildlife are in the area or a safe distance away) , and keep them safe from predators.</p> <p>So, they would need to bring their gun, binoculars, personal gear, boots suitable for walking on the tundra, sleeping bag/pillow.</p> <p>Would the HTO be able to pay the monitor and invoice StrategX? I would expect this would be about \$1000/day depending on the weather and wildlife activities.</p> <p>Thanks again Dolly, and I look forward to hearing from you.</p> </div> <div> <p>Wed, Aug 4, 9:25 AM</p> <p>days</p> </div>

May 14, 2022	10:00	Tasijuaq and Aviat	Igloolik HTA and QIA CLARC	<p>In attendance: StrategX Elements Corp. representative; Denise Lockett Interpreter: Janet Airut Sidonie (QIA CLO) Louis Tapardjuk Sr. (ex MLA) QIA Representative Isaac Ungalaq – CLARC Natalino Piugattuk, HTO rep for CLARC David Irngaut, HTO Chair Solomon Mikki, HTO Vice-Chair Michelline Ammaq – HTO Neve Uttak – Hamlet Rep for CLARC</p> <p>The meeting was to be held the previous day at 3:00 p.m. (QIA CLARC) but the flight was late and the meeting was rescheduled to May 14, 2022 10:00 am. At the HTO office so that elders could avoid the steep stairs at the QIA CLARC office.</p> <p>10:30 a.m. opening prayer, welcome and introductions. Sidonie had printed out the previous non-technical summary and had provided it to those in attendance. This was for the Tasijuaq Project.</p> <p>Denise spoke through the interpreter and thanked everyone for their patience as the plane was late yesterday. She thanked them for rescheduling the meeting and appreciated the time that they took away from their weekend for the meeting.</p> <p>She introduced StrategX and explained that they were a fairly new exploration company looking for the</p>

			<p>types of minerals and metals that are in batteries. She explained that as the Inuit knew, the climate is changing rapidly and the world now needed to get away from diesel and into more electric forms of power. That is why the company is exploring for minerals and metals that go into things like batteries. The company had made an agreement with North Arrows (exploring for Diamonds near Naujaat) for use of their fully permitted camp Mel, which is on Crown Land.</p> <p>Denise first explained that the company would like advice and support from people in Igloolik on two projects that the company was proposing to explore on this summer that could affect people from Igloolik. When asked if she was going to Sanirajak and Naujaat, she explained that originally she was supposed to right after the meetings in Igloolik, but unfortunately there were no hotel rooms in either community, so they would have to meet via phone.</p> <p>The Aviat project was previously explored by other companies for diamonds. Now StrategX would like to explore for minerals and metals that are used in batteries this summer. The project is on Crown Land and they would propose to put in a small temporary exploration camp or could also be based out of the Mel camp decided at this point. The exploration would involve ground exploration followed by drilling between July and weather.</p> <p>Denise explained that although last year she had gone to Sanirajak and spoke, the community did not want a and the company agreed with that. The company asked for a wildlife monitor to work with the company last year response despite asking several times.</p> <p>A wildlife monitor was contracted last year from Naujaat to accompany the exploration crew and provide direction and if the company could or could not fly the helicopter that day due to the nearness of wildlife.</p> <p>Denise discussed what was proposed with the Tasijuaq Project on IOL which would also be helicopter support North Arrow's Mel Camp.</p> <p>The company would like to hire Wildlife Monitors from all three communities to provide advice and direction to pointed out that this was different from just "picking up a person off the street, to be a bear monitor". Denise asked work together and give the community the power to authorize helicopter movements to avoid impacting wildlife.</p> <p>Louis, Isaac and Solomon commented that helicopters impact caribou and they can be heard long before they see the animals away and this causes hardship for the communities who have to go further and further away in search of fish are also impacted due to the vibration of the helicopter.</p> <p>They asked if the company could use quads, as Baffinland could. Denise responded that they company could use that she look into this further as it was preferable to helicopter use.</p> <p>Michelline stated that since QIA CLARC and HTO were both at the meeting, they agreed that they were not in supported exploration work. People from Igloolik could not hunt on Baffin Island and had to travel long distances impact from helicopter noise on caribou was too great of a risk, and they did not want to wildlife to be impacted</p>

June 28, 2022	12:00	Nagvaak	Naujaat Arviq HTO, In attendance: , Paul Angutetuar , Chair Mary Tuktudjuk, Vice Peter Mannik, Sec. Treasurer Peter Putulik, Member John Ell Tinashlu, Member Mark Tigumiar, Member Sara Kidlapik, Member Annie Angotialuk , Member	<p>Denise (DL) provided an a summary of what the company did last year at RE – 27 (called the Nagvaak Project) ground exploration activities and sampling last year and now would like to go back this year and do drilling. (very hard to hear the questions. The Chair Peter Angutetuar repeated all the questions so that Denise could hear them. Question (Q): what is it you are exploring for again? DL: they are minerals and metals that basically go into batteries. The world is moving away from diesel fuel towards batteries. So, these would be for batteries.</p> <p>Q Will you be filling bags again? How many? DL: no, we are not North Arrow who has been exploring in your community. We are StrategX Elements and we are looking for minerals and metals that go into batteries.</p> <p>Q: do you have any pictures or video from what you did last year that you can show us? DL: I will find out and send them to you.</p> <p>Q: how deep will you be drilling? How many holes? DL: I will find out and let you know.</p> <p>Q: do you know the value of what you will be taking out of the ground and how much profit you will have? DL: we are in exploration and exploration doesn't make a profit. Only if the project becomes a mine do you make a profit now, there is no profit.</p> <p>Q: we would like to know the results of the drill program. We want a paper trail. DL: yes, I think it's a good idea to share with you the results of what we have been exploring for from previous years. you can see that each year depends on the success of the year before. If there is no success, then sometime in the future we will come back.</p> <p>Q: will there be wildlife monitors and helpers? DL: Yes, will work with Dolly on the specifics e.g., timing of when we would need the person, payment etc.</p> <p>Q: we would like to come out to the camp and visit the drill and see what you guys are doing. DL: that's a great idea. Yes, the company could do that. 1-2 Board Members. We would pay for their expenses.</p> <p>DL: if you think of any follow up questions, please let me know. I am available at any time. I'm sorry I couldn't be there in the community in May and June because of no available hotel rooms.</p> <p>Q: you should buy a house in the community!</p>

				<p>DL: Great idea, but not practical at this point. Maybe North Arrow can, and I can stay there!</p> <p>Thanks for the meeting. And I will send the requested information right away.</p>

In addition, they would b out or Sanirajak instead of the Mel camp to reduce impacts of wildlife. Either basing out of the hotel, if they h renting a house could work.</p> <p>Thanks again for your help in keeping this going. I look forward to hearing from you.</p> <p>Denise A Lockett</p> <p>lokettda@telus.net 604-340-4756</p>
