

PART 1 FORM PROJECT PROPOSAL INFORMATION REQUIREMENTS

For more information about the Nunavut Impact Review Board (NIRB) please visit our web site http://nirb.nunavut.ca/ or to access NIRB documents, project screenings, and project reviews please visit the Nunavut Impact Review Board ftp site http://ftp.nunavut.ca/nirb.

IMPORTANT!

Please be advised that your application will not be processed until the Sections 1 - 9 are completed in their entirety, in both English and Inuktitut (+ Inuinnagtun, if in the Kitikmeot).

SECTION 1: APPLICANT INFORMATION							
1.	. Project Name Current Project Name Under Review, otherwise known as "Nanuq North"						
2.	Applicant's full name and mailing address:						
Indicator Minerals Inc. Phone: 604.331.4605							
	275 . 1075 West Georgia StreetFax:604.331.4654Vancouver, BC V6E 3C9Email:andream@indicator						
	variouver, be ver see		didicalle indicatorimetals.com				
3.	Primary contact's full name and mailing addres	ss:					
	Andrea Maynes, Indicator Minerals Inc.	Phone:	604.331.5098				
	275 . 1075 West Georgia Street	Fax:	604.331.4654				
	Vancouver, BC V6E 3C9	Email:	andream@indicatorminerals.com				
	SECTION 2: AUTHORIZATION NEEDED						
	Indicate <u>all</u> authorizations associated with the project proposal:						
1.	Indicate <u>all</u> authorizations associated with the pr	roject proposa	ıl:				
1.	Indicate <u>all</u> authorizations associated with the property Regional Inuit Association (RIA)		al: adian Launch Safety (CLS)

260 kilometres NE of the proposed camp location, and the community of Chesterfield Inlet, NU is approximately 230 kilometres S of the proposed camp location.

approximately 230 kilometres S of the proposed camp location.								
6c. Discuss the history of the site if it has been used for any project activities in the past.								
No history of the site is	No history of the site is known. It may have been used for exploration activities by Peregrine							
		of two of their mineral claim						
6d. Indicate if there are any known archaeological/palaeontological historical sites in the area.								
There are no known arc	haeological/palaeonto	logical historical sites in th	e area.					
7. Land Status (check all t	hat applies):							
x Crown	Commissio	nersa	Municipal					
Inuit Owned Surface		d Sub-Surface Lands						
	ct coordinates specific	to exploration have alread	y been screened					
Min Lat (degree/minute)		Min Long (degree/minute)						
Max Lat (degree/minute)		Max Long (degree/minute)						
NTS Map Sheet No:								
(Please ensure that maps of the project are attached (1:50,000 if available , 1:250, 000 Mandatory) available from Natural Resources Canada)								
8b. If the project proposal includes a camp, please provide the coordinates of the camp location								
Min Lat (degree/minute)	65°23'55" N	Min Long (degree/minute)	91°14'40" W					
Max Lat (degree/minute)		Max Long (degree/minute)						
If different from above for the camp: NTS Map Sheet No: 1:50,000 NTS Map Sheets 056G06 Please ensure that maps of the project are attached (1:50,000 if available, 1:250, 000 Mandatory) available from Natural Resources Canada								

Please note that additional location information may be required in a subsequent Project Specific Information Requirement (PSIR) submission. This may take the form of a digital Geographic Information Systems (GIS) file.

SECTION 4: NON-TECHNICAL PROJECT PROPOSAL DESCRIPTION

Please include a non-technical description of the project proposal, no more than 500 words, in English and Inuktitut (+Inuinnagtun, if in the Kitikmeot). The project description should outline the following:

- The project activities, their necessity and duration;
- Method of transportation;
- Any structures that will be erected (permanent/ temporary);
- Alternatives considered; and
- Long-term developments, the projected outcome of the development for the area and its timeline.

IMPORTANT: If the proposed activities require submission of a NIRB Part 2 PSIR Form, please complete Section 8 only, otherwise continue on with Section 5.

SECTION 5: MATERIAL USE

1. List equipment to be used (including drills, pumps, aircraft, vehicles, etc.):

Equipment type and nu	ımber	Size – dimension	s Proposed use			
2a. Detail fuel and hazardous material use:						
Rumber o Container and Capaci of Containe		Total Amount of Fuel (in Litres)	Proposed Storage Methods	6		
Diesel						
Gasoline						
Aviation fuel						
Propane Other						
Outer						
Hazardous Materials and Chemicals		Total Amount of Hazardous Materials and Chemicals (in Litres)				
2b. Describe the proposed Spill Prevention Plan.						
3a. Detail the anticipated daily water consumption rates						
Daily amount (m³)		ater retrieval hods	Proposed water retrieval location			
3b. Have you applied for a water License with the Nunavut Water Board?						
□ YES □ NO						
If yes, what class of licence?						
□ C						

□ Class B Water Licence

SECTION 6: WASTE DISPOSAL AND TREATMENT METHODS

1. List the types of waste associated with the proposed project activities:

Type of waste	Projected amount generated	Method of Disposal	Additional treatment procedures					
Sewage (human waste)								
Greywater								
Combustible wastes								
Non-Combustible	Non-Combustible							
wastes								
Overburden (organic soil,	Overburden (organic soil,							
waste material, tailings)								
Hazardous waste								
Other:								
2. Describe the propos	2. Describe the proposed Waste Management Plan.							
		VEMENT & REGIONA						
meetings if available		e been contacted and prov						
Community	Name	Organization	Date Contacted					
	SECTION 8: GEN	ERAL QUESTIONS						
1. Will you be disturbing any known archaeological sites?								
□ Y	ES		X NO					
SECTION 9: APPLICANT SIGNATURE								
Please sign and date your application:								
Signature	Title		Date					

APPENDIX A Project Type Definitions

- **Access Trail**: A project proposal with the objective of providing vehicular access to an area of interest involving minimal alteration to the terrain.
- **Advanced Exploration:** A project proposal with the objective of identifying size, grade, and physical characteristics of a mineral occurrence and to assess the economic and technical feasibility of developing the mineral deposit into a producing mine
- All-Weather Road: A project proposal with the objective of road construction for use in all seasons.
- **Bulk Sampling:** A project proposal with the objective of extracting of large samples of mineralized material involving hundreds to thousands of tonnes. Samples are selected as representative of the potential mineral deposit being sampled. May involve crushing/milling (on small-scale)
- **Harvesting activities:** A project proposal with the objective of harvesting animals, marine mammals and/or fish from their natural habitats by means of hunting or trapping for traditional and commercial use.
- Marine Based Activities: Any activity occurring in the marine environment, such as vessel use associated with land-based activities or disposal at sea.
 - *Please note that normal community re-supply or individual ship movements not associated with land-based project proposals shall not be screened by NIRB (Section 12.12.2 of NLCA).
- **Mine Development:** A project proposal with the objective of extracting broken rock with mineralization of sufficient grade and tonnage to sustain commercial mining operations (ore). Mining a body of ore can be achieved by either open pit and/or underground development. Mine development may involve milling. Milling involves treatment of the extracted ore through a combination of mechanical and chemical processes to selectively recover the valuable mineral.
- **Mineral Exploration:** A project proposal with the objective of exploring an area to find geological anomalies. It involves site reconnaissance (ground and/or air) to locate broad and fiscal mineral deposits.
- **Offshore Infrastructure:** A project proposal with the objective of building off loading facilities constructed off the shoreline and connected to the mainland of the marine or freshwater environment. Examples include a jetty, dock, or port facility.
- **Oil and Gas Exploration/Activities:** A project proposal that includes 1) exploration, such as seismic or geological mapping, 2) drilling of oil and gas wells, 3) construction and operation of a pipeline, a gas processing plant or any oil and gas facility within Nunavut.
- **Pits and Quarries:** A project proposal with the objective of pitting, which involves the extraction of granular material (i.e. sands and gravels) and quarrying, which involves the removal of consolidated rock (i.e. bedrock, frozen soil).
- **Scientific Research:** A project proposal with the objective of implementing a series of site activities comprised of observation of phenomena, measurement and collection of data necessary for scientific investigation in designated areas within a limited time period.
- **Seismic Survey:** A project proposal with the objective of conducting a survey to map the depths and contours of rock strata by timing the reflections of sound waves released from the surface. Survey site locations may be offshore (not within 12 nautical miles of any coast), near shore, and extended onshore.
- **Site Cleanups:** A project proposal with the objective of site cleanups (includes DEW line site cleanups), which focuses on the remediation of chemically contaminated soils, stabilization of landfills and dumps, demolition/disposal of infrastructure and debris and monitoring after cleanup is completed.

- **Tourism Activity:** A project proposal with the objective of conducting travel predominantly for recreational, sport or leisure purposes within a designated area and limited time period.
- **Winter Road:** A project proposal with the objective of building a road for winter use by leveling and compacting surface snow and ice. Winter road is removed at end of season.
- **Winter Trail:** A project proposal with the objective of building a trail for winter use by a single pass of a tracked vehicle using a blade, if necessary.
