Subject: Re: 091116 2BE-NQN0914 Approved Amendment to Licence for Indicator Minerals
Date: Wednesday, November 18, 2009 11:13:47 AM

Hi Phyllis,

I would like to comment that I am very concerned that the license require compliance with incinerator emissions standards explicitly and that they not be voluntary "efforts" or "recommendations". We also think the license must explicitly state that no hazardous or radioactive material may be incinerated and that the proponent should submit a valid waste disposal license and agreement with a licensed waste facility for hazardous waste at the site.
