Attn: Richard Dwyer
Dear Richard:

This letter is being sent to request an amendment to Northquest Ltd's water licence, identified as: NWB 2BE-PBP, Pistol Bay Project.

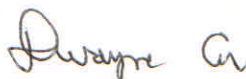

Northquest Ltd requests an increase in allowable daily water consumption of the diamond drill and in the length of drilling program. A mathematical error was made in the initial calculations of water consumption of the drill. The original estimate of 50 cubic metres of water per 24 hour shift was incorrect. A more likely figure of 85 cubic metres will probably be required. This volume is typical for the type of lightweight drill that will be used.

It is therefore requested that an amendment be granted to allow Northquest Ltd to consume up to 85 cubic metres of water per day during the drilling phase of the program.

As well, it is likely that the drill will be active for at least 30 days, rather than the original 20 days that were part of the estimate.

NPC and NIRB have been informed of this request and will forward their responses to you.

Sincerely,

Dwayne Car,
VP Exploration, Northquest Ltd
