

## **Waste and Disposal of Waste**

- **Sewage**  
Approximately 2500 lbs of sewage will be produced over the life of the program. It will be retained in latrine pits.
- **Camp grey water**  
Approximately 0.3 cubic metres of grey water will be produced each day. It will be retained in sumps.
- **Combustible solid waste**  
Combustible solid waste will be transported to the Whale Cove municipal dump every second day.
- **Non-combustible solid waste, including bulky items/scrap metal**  
Non-combustible solid waste will be transported to the Whale Cove municipal dump.
- **Hazardous waste or oil**  
Hazardous waste will be transported to the Whale Cove municipal dump and will be identified as such to the employees of the dump.
- **Contaminated soils/snow**  
Contaminated soil will be collected in empty drums and will be shipped to the Whale Cove municipal dump, where it will be identified as such.
- **Empty barrels/ fuel drums**  
Empty barrels and propane cylinders will be returned to the suppliers in Churchill.
