Hi,

There is approximately 30 km between the 2 projects. Why we ask for 2 licences instead than one for these projects? Its because of the "new" definition interpretation for the water use that include the indirect water used to keep the lines unfrozen. So, the needs in water are higher and even if for the moment the 2 exploration projects are from grassroot, we are confident to have good exploration results. If this occurs, we'll have the licences to accommodate more drills in water supply and this will avoid the obligation to ask for an amendment.

The SCP for these projects are almost completed, I should be able to send it to you by the first or second week of November.
