Hi Karen,

I think it was not detailed in the water licence applications, but for the licence 2BE-PTR and 2BE-PKR it would be appreciate to have the conditions related to drilling on ice. The NIRB has screened the project including the drilling on ice and include some conditions in the decision.

The majority of the drilling is planned to be realized during the summer period, but to avoid to ask for an amendment if AEM decides to drill on ice, it would be great to already have the condition for that.
