**Summary of Water Use Licence 2BE-QAM0813 Amendment**

We would like to amend our current Water Use Licence 2BE-QAM0813 for the Turqavik-Aberdeen Project. The only change to our project scope is that we would like the ability to use 2 diamond drills for our exploration. Currently, our water licence allows for daily water use at camp and at 1 drill totalling  $58 \text{ m}^3/\text{day}$ . We would like to have our allowable daily water consumption increased by another  $55 \text{ m}^3/\text{day}$  to accommodate 2 drills. The daily water use would then total  $113 \text{ m}^3/\text{day}$  for our project.
