Hi Rebecca;

Water licence application and Supplemental Questionnaire attached sorry I neglected to include in reply to you yesterday.

Yes the summary would be a brief description of the amendment.

Please have application and supplemental questionnaire completed and e-mailed in along with the rest of the amendments requirements.

The NPC (Aglukark@npc.nunavut.ca) and NIRB (info@nirb.ca) you will need to contact and request whether or not their determinations are required for this amendment. I've attached the previous NPC & NIRB decisions from 2008 if you would like to include in your e-mails to them.

The NPC and NIRB decisions you will then forward to the Nunavut Water Board as part of the application. Once all information is received it will be distributed for the 30 day commenting period to interested parties.

Regards

Richard

Hi Richard,

Thank you for the information. I just need some clarification on a few things. What is the summary of the amendment? Is it the non-technical proposal or the cover letter or something else? Also, how does the amendment get to NIRB and NPC so they can either say no additional screening is required or request more. How do I fill the NIRB sections out on the amendment form? Do I just send you the cover letter saying we want our water use increased to accommodate the use of 2 drills to get things started, or does NIRB etc. need the entire amendment application etc. to

make a decision.

Cheers,
Rebecca
