Note:

With regards to your question on the specific locations of the proposed drill holes and camp for the Regan Lake project, please refer to the accompanying 1:100,000 scale map, Regan Lake Project Locations. There are 10 to 12 proposed drill holes for the project, 8 to 10 of which will be drilled on Crown Land on ML3017; the other two will be drilled on IOL parcel BB-09. The scale of the map does not permit for individual holes on ML 3017 to be shown but they will be spaced approximately 50 m apart from each other. If you have any questions regarding the proposed camp and drill hole locations or other concerns about the application, please do not hesitate to contact either Ken Armstrong or myself.

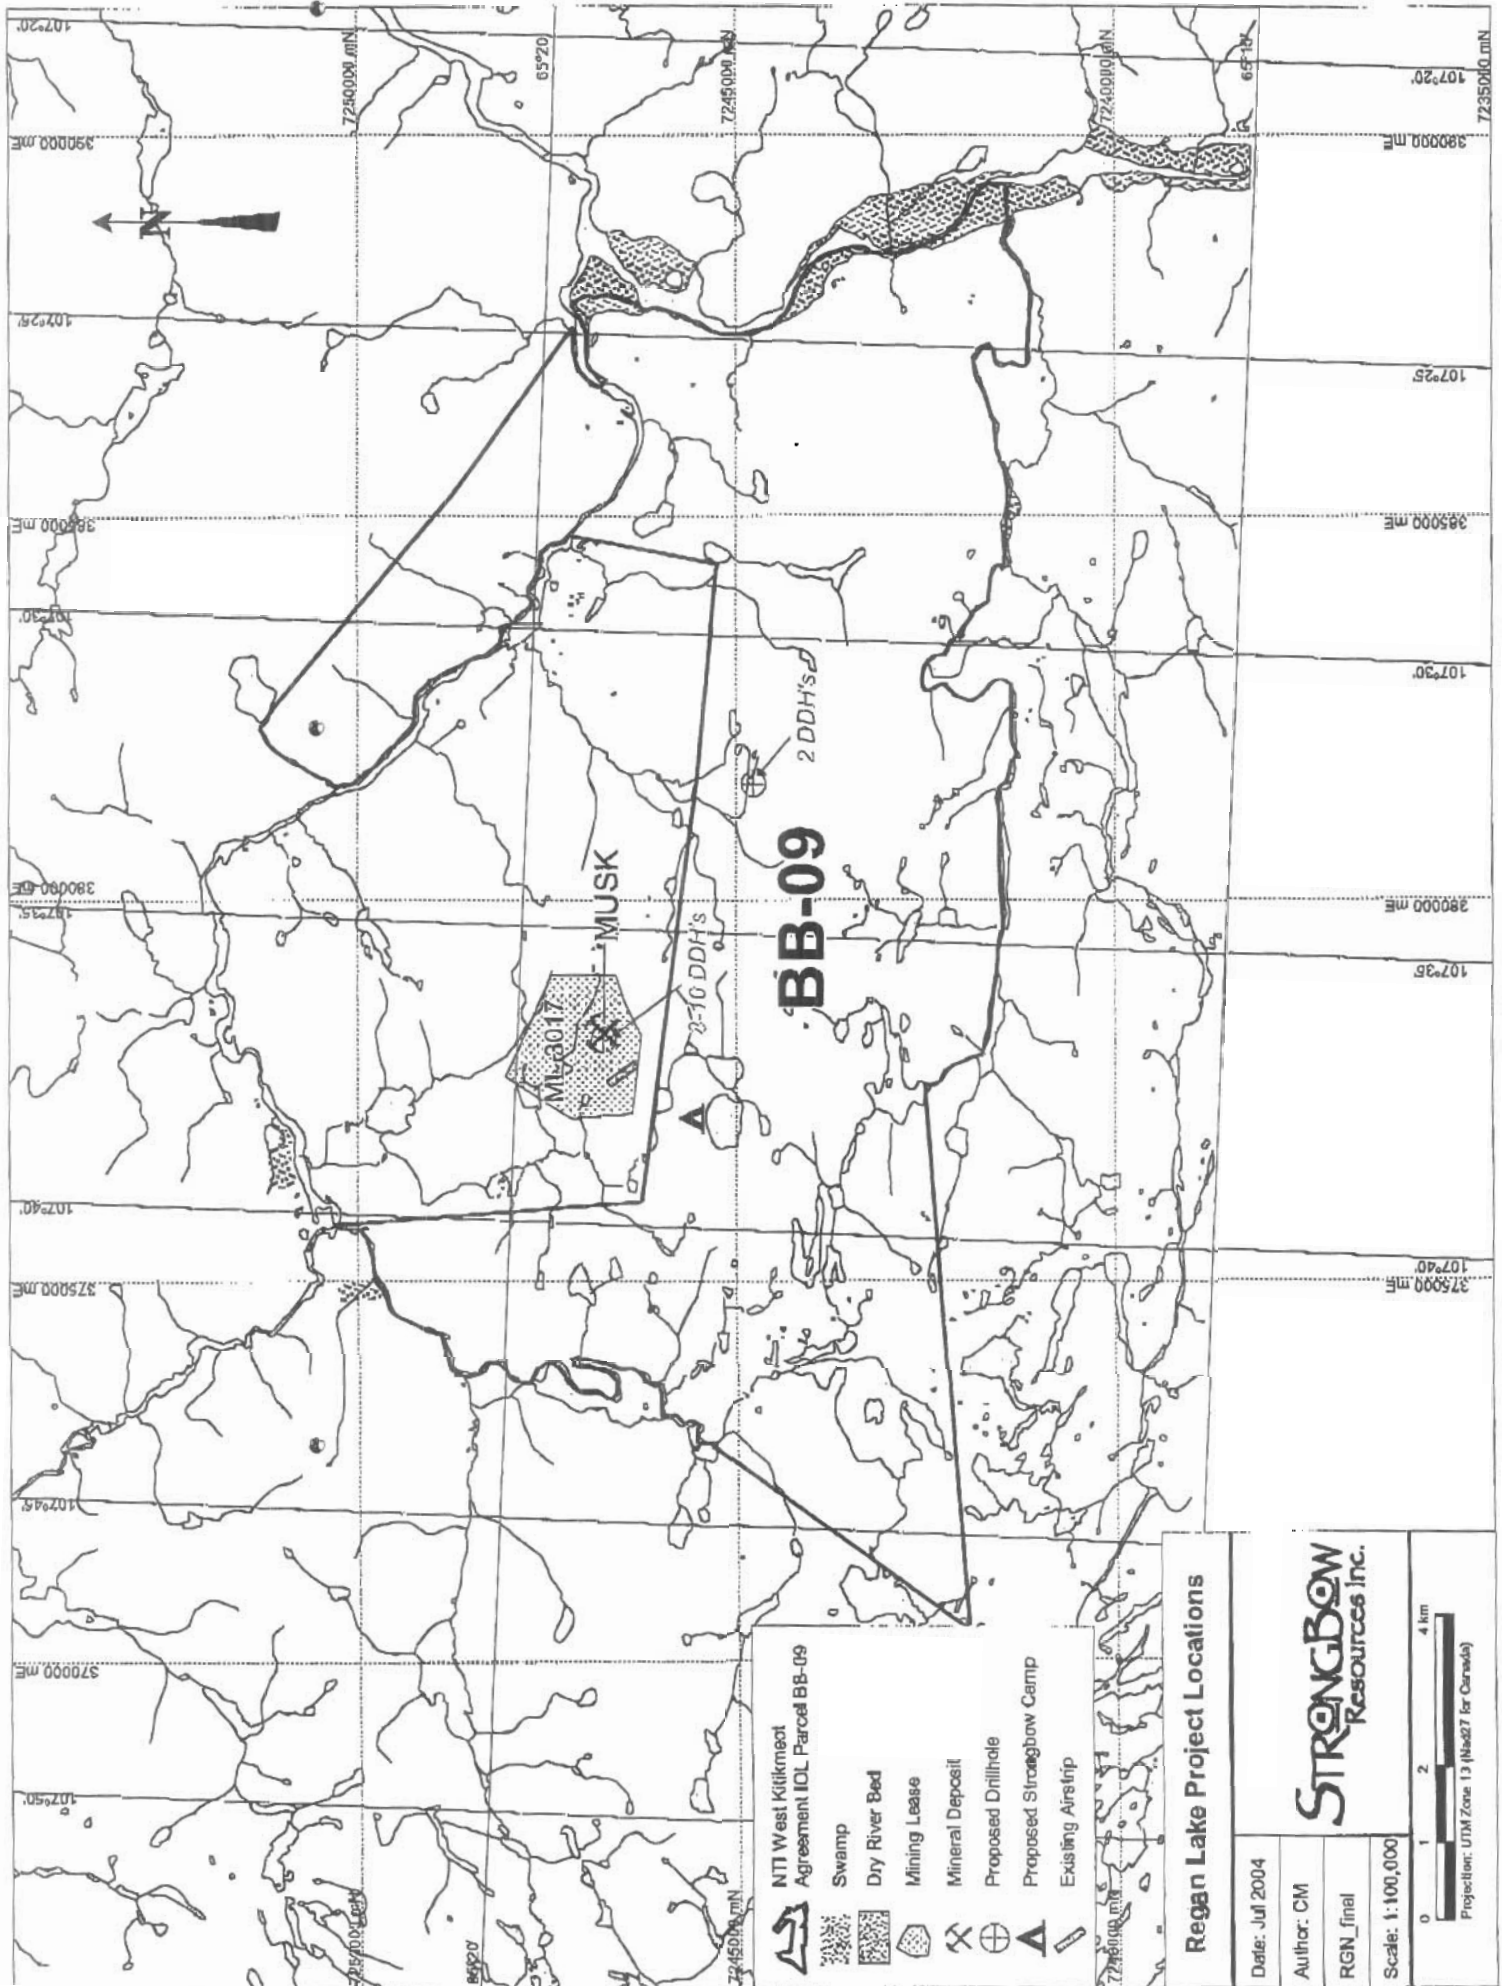

Sincerely

Colleen Muntener
