

NWB Annual Report

Year being reported:

2008

License No: 2BE-REG0608

Issued Date: August 1, 2006

Expiry Date: July 31, 2008

Project Name: Regan Lake

Licensee: Strongbow Exploration Inc.

Mailing Address: Suite 960 – 789 West Pender Street
Vancouver, BC, Canada V6C 1H2

Name of Company filing Annual Report (if different from Name of Licensee please clarify relationship between the two entities, if applicable):

North Arrow Minerals Inc.

General Background Information on the Project (*optional):

During 2008, North Arrow conducted a small exploration program on the Regan Lake Property that included ground geophysical surveys and a one-hole diamond drilling program. Between June 18 and 21, 2008, one diamond drill hole was completed on the Regan Lake property. Drill hole RL-01-08 was collared at easting 372850, northing 7223523 (NAD83 UTM Zone 13) and was drilled to a depth of 278 metres at an azimuth of 215°, dipping at 45°. From May 23 to June 5, 2008, a ground geophysical program consisting of a horizontal loop electromagnetic survey and a total field magnetic survey was carried out on the Regan Lake Property. The work was conducted from the Silvertip camp (NWB license 2BE-SIL0709) located 38 km to the south southwest. Transportation was via helicopter from the Silvertip camp with four field workers involved in conducting the surveys.

Licence Requirements: the licensee must provide the following information in accordance with

Part B

Item 2

A summary report of water use and waste disposal activities, including, but not limited to: methods of obtaining water; sewage and greywater management; drill waste management; solid and hazardous waste management.

Water Source(s): Diamond Drill hole location (NAD83 UTM zone 13) E372850
N7223523

Water Quantity: 100 cu.m/day (including drilling) Quantity Allowable Domestic (cu.m)

less than permitted amount	Actual Quantity Used Domestic (cu.m)
100 cu.m/day (including domestic)	Quantity Allowable Drilling (cu.m)
less than permitted amount	Total Quantity Used Drilling (cu.m)

Waste Management and/or Disposal

- ☒ Solid Waste Disposal
- ☒ Sewage
- ☒ Drill Waste
- ☒ Greywater
- ☐ Hazardous
- ☐ Other:

Additional Details:

All combustible waste was incinerated daily in a burn barrel constructed/modified for this purpose. Non combustible waste was backhauled to Yellowknife at the end of the 6 day program. The small amount of greywater that was produced during the course of the program was deposited in a natural depression located immediately adjacent to (east of) the camp area and more than 30 metres above the high water mark. Any human waste produced during the land use area was immediately buried in small pits.

A list of unauthorized discharges and a summary of follow-up actions taken.

Spill No.: (as reported to the Spill Hot-line)

Date of Spill:

Date of Notification to an Inspector:

Additional Details: (impacts to water, mitigation measures, short/long term monitoring, etc)

No unauthorized discharges occurred under the authority of this license during the 2008 exploration season.

Revisions to the Spill Contingency Plan

SCP submitted and approved - no revision required or proposed

Additional Details:

n/a

Revisions to the Abandonment and Restoration Plan

AR addendum attached for Board consideration

Additional Details:

Final Abandonment and Restoration Plan attached/included for Board consideration.

Progressive Reclamation Work Undertaken

Additional Details (i.e., work completed and future works proposed)

Due to the small scope of the work the restoration work required upon abandonment of the land use area was minimal. The small amount of greywater that was produced during the course of the program was deposited in a natural depression located immediately adjacent to the drill area and more than 30 metres above the high water mark, and any human waste produced during the land use operation was immediately buried in small pits. All camping supplies and non-combustible garbage was removed from the area upon demobilization of the camp, leaving little to no evidence of the land use operation.

Results of the Monitoring Program including:

The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitude) of each location where sources of water are utilized;

Not Applicable (N/A)

Additional Details:

n/a

The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitude) of each location where wastes associated with the licence are deposited;

Details described below

Additional Details:

Water used for diamond drilling was sourced from a small lake nearby the drill at E372850 N7223523 (NAD83 UTM zone 13).

Results of any additional sampling and/or analysis that was requested by an Inspector

No additional sampling requested by an Inspector or the Board

Additional Details: (date of request, analysis of results, data attached, etc)

n/a

Any other details on water use or waste disposal requested by the Board by November 1 of the year being reported.

No additional sampling requested by an Inspector or the Board

Additional Details: (Attached or provided below)

n/a

Any responses or follow-up actions on inspection/compliance reports

Inspection and Compliance Report received by the Licensee (Date):

Additional Details: (Dates of Report, Follow-up by the Licensee)

An inspection report was done for the project in 2009 - this report was received by North Arrow in 2014.

Any additional comments or information for the Board to consider

Appended to this annual report is the Final Abandonment and Restoration Report for the consideration of the Board.
