Proposed Winter-Access Route from Terminus of Lupin Winter Road to Rockinghorse Camp

A temporary ice route, or, alternatively, a push-in trail only, of approximately 32km (RED dotted line)

Is being considered for use in 2003; it would pass through Musko Lake on the property and proceed northeastward to Rockinghorse camp. The route or trail would be used to transport the

core drill (which would be driven via the Lupin Winter Road) and to ferry fuel drums staged at
Lupin.
