Hello, Richard.

Thanks for your prompt reply and the example (as well as the pdf copy of the Sask Guidelines - I had a paper copy but the pdf is very useful). I hope you enjoyed your holiday and I will have Western's Exploration Plan to you shortly. Thanks again for bringing this oversight to our attention.

Best regards,

Douglas R. Bowden

Subject: Uranium Exploration Plan

Richard:

I am the Project Manager for Western's Sand Lake exploration project and am responding to your email of July 4 to Pamela Klessig. Apparently our permit consultant did not complete a plan as required. I am in the process of correcting this error. I called your phone number today (Friday 6 July) to discuss the situation but forgot about the time difference. I would like some information or guidelines on what format and content the NWB would like to see in the plan. This would really help me a lot in completing this deficiency as quickly as possible. I will call again on Monday, July 9th but if you'd like to call me at your convenience, that would be fine. My number is listed below and Reno is in the Pacific time zone. If email is more convenient for you, that is fine as well. Thank you.

Doug Bowden
