In answer to question one, after repeated inquiries about that issue we finally got an approval for disposal of domestic waste from Dennis Zettler in Baker lake in the form of an email chain. I hit a wall a few times trying to get a proper letter from the Hamlet council. No refusals, just wasn't happening. Please see the attached email string where Dennis approves the dumping with the condition of filling out a dumping form.

I will look closer at the second issue.

Tony

Subject: Re: 2BE-SCH-0712 Renewal Application

Thanks for the email Anthony, I look forward to getting the report for 2014. Please cc our Licensing department so they can upload that info to our ftp site, for the 2BE-SCH0712 file. Also Anthony, do you have a response to the following questions I posed earlier:

1. The NWB requests that written confirmation be provided from the Hamlet of Baker Lake, confirming that the Licensee can dispose non-hazardous waste materials in their landfill facility.

2. Please update the Spill Contingency Plan. (items required are listed below:

- A complete Response Organization Flow Chart (Section 3);
 - On-site company contact information, once available (e.g., the On-Scene Coordinator referenced in section 3.1 and the On-Site Geologist referenced in Table 2); and
 - A schematic of the Judge Sissions Lake Camp that references where fuel caches and spill response kits are situated, as well as nearby water sources.
 - Based on the Department Of Environment Spill Contingency Planning and Reporting Regulations, Contingency Planning and Spill Reporting in Nunavut (a Guide to the New Regulations, and Guideline for the General Management of Hazardous Waste in Nunavut): Page 9 of the Spill Contingency Plan stated that the proponent will "contact Federal and Territorial regulatory agencies to identify appropriate disposal methods before disposing of contaminated material. Please note that the government does not provide disposal instructions for spilled and/or contaminated materials. It is the proponent's responsibility to develop a complete plan which addresses the steps to be taken from the start of the spill, up to and including the final clean up and disposal. Regulatory agencies such as the Department of Environment can review the final plan to assess its adequacy and provide advice at that time. The Nunavut Water Board request that such a plan be developed for review.

Hi Cynthia,

Sorry to have taken so long to get back to you.

You can find reports 2009, 2011-2013 here:

<https://app.box.com/s/sq7tx09m9el6pbusr1zcol2nonfso7>

I am not currently working for Forum right now but I will try and get you the 2014 report as well.

Tony

Hi Cynthia,

NIRB informed me of the outstanding reports by letter and I have since submitted all of them (Phyllis was CC'd too). I have not heard a response but hopefully they are satisfactory and the process can now continue.

Thanks for the update,

Tony

Good day Mr. Williamson,

I'm writing to provide an update on your file 2BE-SCH-0712 at the NWB.

Please do not hesitate to contact me if you have revised information or have any questions.

Thank You.
