Re: Extension of NWB Permit No: NWB2SIS0002

Dear Ms. Becker:

The current Nunavut Water Board permit (NWB2SIS0002) will expire as of February 1, 2002. No further exploration work is planned for the near future (5 – 10 years?), but we do plan to carry out clean-up of the camp and core storage site over the next few years. This will involve taking out the remaining fuel drums and cleaning up any materials on the ground due to damage by weather, beast and man. Some of the buildings in bad shape will be burned (abiding by all regulations).

I would like to request a two-year extension of the current permit, which will give us two summers of clean-up in the area. No exploration activities will take place during this time (as Nunavut currently has a no-uranium mining policy in place).

The Water Licence Application Form (3 pages) will be faxed to you today, and the \$30.00 fee will be mailed as soon as I can get it through the accounting department.

Thanks for your time,

Sincerely,

Ken Wheatley,
Senior Geologist, COGEMA Resources Inc.
