**Subject:** Renewal Application for 2BE-SNN0508

Good Afternoon Don,

Further to our telephone conversation of earlier this week regarding the minor blasting and trenching activities described in the renewal application for 2BE-SNN0508 please see the attached photograph.

The picture is of work conducted during the 2008 field season on the Aviat project and is indicative of the scope of the sampling activities that are described in the renewal application.

If you have any questions regarding this or any of the documents submitted in conjunction with the renewal please do not hesitate to contact me. I will be out of the office next week and will not be accessing my email during that time, however I will be returning on Monday October 6, 2008 and will address any emails received after 5:00pm PST today immediately upon my return.

Thank you for all of your assistance with helping to clarify the scope of the activities, and if there is any further information that you need please let me know!

Best regards,

*Nicole*
