Re: Amendment Request for Nunavut Water Board Licence No. 2BE-STO1015

Dear Ms. Beaulieu,

Please accept this application for an amendment to the approved Nunavut Water Board (NWB) Licence No. 2BE-STO1015. Provisions in the existing licence address water use for a small, temporary exploration camp and diamond drilling activities within an approved area, located in the southeast quadrant of Prospecting Permit No. 7548, held by Commander Resources Ltd. This application requests approval for a new diamond drilling program, consisting of 20 holes, at a new location within Commander's adjacent prospecting permit, No. 7549. Map 1 (attached) indicates the extent of the current project, as well as the additional proposed area.

The purpose of the amendment is to expand the area available for diamond drill exploration at Commander's Storm Project to include the Seal zinc-lead deposit. The proposed changes will not affect the type of water use, quantity of water used, or environmental considerations.

Please do not hesitate to contact me with any questions or concerns or for any additional information, either by phone or e mail, spotts@commanderresources.com.

Best Regards,

Stephen Potts, P.Geo
VP Exploration
