

**COMMANDER RESOURCES LTD.
BASELINE DATA (QUESTION 39)
FOR THE STORM PROJECT**

July 2012

The following data will be collected as part of Commander's exploration programs at the Storm Project:

1. Physical Environment

- Photos will be taken of the campsite and fuel cache areas before, during, and after field activities so that any changes to the physical environment can be documented.

2. Biological Environment

- Photos taken of the campsite and fuel cache areas as described above will also document changes to vegetation in the area.
- Wildlife logs will be maintained so that a record of all wildlife seen within the project area will be documented.

3. Socio-Economic Environment

- Records of all Inuit employment generated by this exploration project will be maintained.
- Any archeological sites discovered will be noted and passed on to the appropriate regulatory authorities.
