1 Summary

CIRNAC Land Use Permit Number: **N2015C0014**

NWB Water Licence Number: **2BE-STO1520**

Work Completed: None

Dates Work Completed: None

Property Location: NTS 058B14, 058B15, 058C02, 058C03, 058C06, 058C07, 058C10, 058C11, 058C13, 058C14, 058F04; Somerset Island, Nunavut, Canada

Storm Camp Location: 73°39'23" N latitude; 94°27'07" W longitude

2 Introduction

The Aston Bay Property is located on northern Somerset Island, Nunavut in the Canadian Arctic Archipelago (Figure 1). The nearest community is the hamlet of Resolute Bay, located 112 km north of the Property, on Cornwallis Island. The Property is approximately 1,500 km northwest of Iqaluit, the capital of Nunavut, and about 1,500 km northeast of Yellowknife, Northwest Territories. The Aston Bay Property includes the Seal Zinc prospect and multiple copper-silver showings, collectively known as the Storm Copper prospect.

During 2019, no exploration work was completed on the Property. All details within the report pertain to the structures, fuel, and equipment that remain on site from the 2018 program.

3 Land Use Area Description and Location

The Aston Bay Property is situated in the Qikiqtaaluk Region of Nunavut, within the 1:50,000 scale NTS (National Topographic System) map sheets 058B14 and 15, and 058C02, 03, 06, 07, 10, 11, 13 and 14. The Property comprises one hundred thirty-four contiguous mineral claims and twelve prospecting permits (Figure 2; Appendix 1). The mineral claims and prospecting permits are 100% owned by Aston Bay.

The Aston Bay Property covers a combined area of approximately 976,357.1 acres (395,118.0 ha). The Property is bound by latitudes 72°45' N and 74°01' N, and longitudes 93°20' W and 95°20' W, and is centered at approximately 73°20' N latitude and 94°30' W longitude.

Figure 1 Aston Bay Property Location

4 2019 Exploration

No work completed.

5 Personnel

No work completed.

6 Land Use Considerations

No work was completed during the 2019 season; therefore, no water was used, nor waste created. The camp stands as it was left at the end of the 2018 season, including structures, a small cache of fuel, and drilling equipment. All that remains on site is described below.

6.1 Camp & Waste

The Storm Camp is located along the Aston River at approximately 73°39'23" N latitude and 94°27'07" W longitude. The camp site is located on an elevated gravel bar in the river valley. It includes an airstrip suitable for landing a Twin Otter. A staging area was established at the east end of the airstrip, approximately 600 metres west of Storm Camp.

Eighteen structures were constructed during 2018, in addition to the four existing plywood structures already on site (pacto toilet shack, storage shack, water tank shack, generator shack). With the exception of the kitchen and core cutting shack, the new structures were all insulated Weatherport tents, built upon existing wooden floors. The kitchen was constructed using dimensional lumber and plywood, upon an existing wooden floor.

Upon completion of the 2018 program, all tents and plywood buildings were left in place for future use. Electronics and communications gear were removed from site. Most other camp equipment was stored on site inside of the tents or plywood buildings. All remaining lumber was stacked at the east end of camp for future use. Tables 2 and 3 list the structures and major equipment left on site at the close of the season on August 25, 2018. Camp photos are included in Appendix 2.

Table 1 Storm Camp Remaining Structures August 25, 2018

Quantity	Item
1	16'x32' plywood kitchen building.
1	14'x32' plywood floor for core shack.
1	12'x20' plywood latrine shack. Includes 5 pacto toilets.
1	10'x16' plywood storage shack.

Quantity	Item
1	10'x12' plywood generator shack. Includes exhaust piping, etc.
1	12'x12' plywood core cutting shack.
11	14'x16' insulated Weatherport tents on plywood floor to serve as sleeper tents. Includes plywood beds, tables, chairs etc.
3	14'x16' insulated Weatherport tents on plywood floors to serve as dries. Includes shower stalls, sink, plumbing, etc.
2	14'x16' insulated Weatherport tents on plywood floors to serve as office and first aid tent. Includes tables, chairs, etc.

Table 2 Storm Camp Remaining Equipment August 25, 2018

Quantity	Item
2	Water tanks (350gal & 250gal)
2	Hot water tanks
2	Water supply pumps with fish screen and hose line
2	Water pressure pumps
1	14 kVA diesel generator with 5 kW gas backups (x2)
1	Electrified bear fence (taken down at end of season)
1	Dual chamber-controlled air incinerator
4	Refrigerators
3	Chest freezers
2	Cooking stoves
1	Dishwasher
3	Washing machines
3	Dryers
17	Toyotomi heating stoves
4	Oil drip stoves
5	Pacto toilets
3	Containment berms for fuel cache & drill equipment
20	Mini berms for tent drums and fuel transfer
	Heavy electrical cables and panel boxes
	Various lumber (stacked by generator shack)
	Various office, camp and medical supplies

6.2 Fuel Storage

During the 2018 program, the existing fuel cache was used, located adjacent to Storm Camp at approximately 73° 39' 23" N latitude and 94° 26' 58" W longitude. A small fuel cache remains at the Property (Table 4), at the cache site. All remaining fuel is stored in covered secondary containment berms. Jet fuel is stored separately from diesel and gas. Remaining propane cylinders were secured to one of the plywood buildings.

Table 3 Storm Camp Fuel Inventory August 25, 2018

Material	Container	Quantity on Site
Diesel	205 L Drum	17 Drums*
Jet Fuel (Jet A)	205 L Drum	26 Drums
Gasoline	205 L Drum	2 Drums
Propane	100 lb Cylinder	7 Cylinders

The fuel cache is located a minimum of 31 metres from the normal high-water mark of any water bodies. No damaged or leaking drums were identified during inspection prior to the end of the 2018 season. Drums were stored in an organized manner with the bungs at the 9 o'clock and 3 o'clock positions. There are no empty fuel drums stored on site.

6.3 Flights

No work completed.

6.4 Drilling

One Multi Power Products Discovery II drill and one Zinex A-5 drill, including most of the ancillary equipment and consumables, were left on site for subsequent drill programs. All equipment was drained of fuel and oil for off-season storage. Tables 5 and 6 list the drilling equipment and consumables left on site at the close of the season on August 25, 2018.

Table 4 Remaining Drill Equipment August 25, 2018

Quantity	Item
1	Zinex A-5 diamond drill with engine, feed frame, control panel, drill head, foot clamp, wireline and drill shack
1	MPP Discovery II diamond drill with engine, feed frame, control panel, drill head, foot clamp, wireline and drill shack
1	Spare engine
1	Spare rotation motor
1	Spare drill head
2	Spare feed cylinders
2	Spare foot clamps
2	Spare winch and pump drive motors
1	Spare main hydraulic pump
1	Spare wireline winch (2 spare rolls of wireline)
6	5 kW gas generators
2	Welders
5	Supply pumps (1 spare transmission)

Quantity	Item
4	Trash pumps
3	Spare down hole pumps
2	Mud separators
6	Mud tanks
8	Coil stoves
3	Diesel heaters
6	Fuel tanks
2	Fly baskets
266	3m NQ drill rods
90	1.5m casing
16	Outer tubes
18	Inner tubes
75	200 psi water line
75	400 psi water line
4	Spill kits
2	Survival shacks
	Various fittings & tooling

Table 5 Remaining Drill Consumables August 25, 2018

Quantity	Item
112	Various drill muds (5 gal pails)
23	Motor oil (5 gal pails)
30	Hydraulic oil (5 gal pails)
36	Antifreeze
140	Calcium Chloride (50lb bags)

6.5 Archaeological Sites

No work completed.

6.6 Inuit Owned Land

No work completed.

7 Wildlife and Environment

No work completed.

8 Reclamation Work

No work completed.

9 Waste Disposal

No work completed.

10 Inspections

Aston Bay is unaware if any inspections took place during 2019.

11 2020 Work Plan

The 2020 Aston Bay Property exploration program is anticipated to include a diamond drilling program of 5,000 to 10,000 metres (m), utilizing one or two drills. The average hole depth is expected to be approximately 250 m, up to a maximum anticipated length of 700 m. Additional exploration work may include soil and rock sampling, mapping and geophysical surveys. The 2020 exploration program is projected to start as early as June and continue until as late as September. Similar programs are anticipated for 3 to 4 subsequent years.

All exploration activities will be helicopter supported and based out of Storm Camp, located along the Aston River at approximately 73°39'23" N latitude and 94°27'07" W longitude. The camp site is located on an elevated gravel bar in the Aston River valley. It includes an airstrip suitable for landing a Twin Otter. Camp infrastructure includes six plywood buildings and sixteen Weatherport tents, built upon wooden platforms.

A fuel cache of approximately 80,000 L (~400 drums) will be established at the current fuel cache location, adjacent to camp. The cache will be primarily diesel and jet fuel, with small quantities of gasoline and propane. All fuel will be stored within secondary containment. All fuel caches will be located a minimum distance of 31 metres from the normal high-water mark of any water body.

With proper design and execution, environmental impacts of the proposed exploration program are expected to be minimal. Plans are continuously being updated for storage and handling of fuel, waste management, reclamation, and wildlife management, all with the goal of ensuring minimal impact on the environment.
