Hello Megan,

It was my impression that your office had already been provided with an annual report. See e-mail discussion below. In any case, I have re-attached our closure report; see appendix B. Please advise if you require any further documentation.

Regards,

Stefan.

Good Morning,

I forwarded this report to the manager of licensing with the Nunavut Water Board.

It has been a pleasure working with you through this process. I will put this site down for inspection next year.

Hello,

Please find attached a report documenting final clean-up and remediation of the Itza Camp.

Regards,

Stefan Kruse.

Good Morning,

With the remediation work completed for Land Use Permit N2013U0006, I would request the submission of a final plan as per the Section 33 of the Territorial Land Use Regulations. Upon receipt of this document and acknowledgment from our division that it is acceptable, we will request a final inspection to be conducted next year.

If the Resource Management Officer deems that the area is clean and recommends approval of the land use permit, you will receive a letter of clearance.

If you have any questions please do not hesitate to contact me at any time.

Best Regards,

Tracey McCaie

Good Morning Phyllis and Tracey,

Mega Uranium has completed the remedial work at the Itza Lake site. Can you please inform Stefan of the steps that Mega will need to take to close the Land Use Permit N2013U0006 and Water Licence 2BE-THE0813.

Thank you,

Christine

>>> Stefan Kruse <skruse.geology@gmail.com> 9/18/2013 9:54 AM >>>

Hi Christine,

Yes, we will be closing all permits related to Mega's operation in Nunavut. The properties have been sold to NEXGEN energy, and Mega will no longer be operating in Nunavut. Is any action on our part required to close-out the permits?

I will get back to you with a date for the report.

Regards,

Stefan.

Good Morning Stefan,

Notice received.

Please provide a date of submission for the clean-up report/ final plan.

Is it Mega Uranium's intentions to close their land use permit now that this work is completed?

Thank you for your prompt correspondence,

Christine Wilson

Hello,

Ookpik has advised us that they have removed the last of the equipment from the Itza Lake Camp and that the clean-up is now complete. We will send you a report detailing the clean-up work completed and photos of the site. Please advise when you have finalized your inspections.

Thank you,

Stefan.

Hello Christine,

The sno-cats went up May 27th and took out the bulk of the fuel (~120 drums). Our crew will head up to Baker Lake on July 23rd to begin removing the tent floors, building etc... Ookpik Aviation has been making trips up in the meantime, removing the remaining fuel by Turbo Otter. We are hoping to have the whole thing wrapped-up by August 3rd, weather permitting.

Regards,

Stefan.

Hi Phyllis,

Please see below in RED in regards to 2BE-THE0813; could you provide Mr. Kruse with directions.

I appreciate it. I will be out of the office from Feb 18 to Mar 4.

Christine

Hello Christine,

No problem submitting a remediation schedule for you. We are in the process of confirming dates for the Itza Lake Camp clean-up with contractors (pending approval from you office). As we have discussed before, there will be no exploration on the ground by Mega Uranium in 2013 since the claims and lease are now owed by NEXGEN Energy. The only work we intend on carrying out is removal of the existing fuel and camp at Itza. Once we have confirmed dates with contractors we can send you the summary of actionable items within the A and R plan and implementation schedule.

On the subject of the Water Use License assignment, this process has stalled because the NWB requested that we have an active Land-Use permit in place in order to process the assignment from Titan to Mega. As you are aware, the AANDC did not issue a land-use permit to Mega after we applied. Does the camp clean-up work require a Water Use license in place considering no water will be used? Please advise.

Best Regards,

Stefan Kruse.

Subject: Re: Itza Lake Camp cleanup by Mega Uranium Ltd.

Good Morning,

I have reviewed all information submitted by Mega Uranium in regards to Itza Lake Camp and have a few follow up questions and requests.

Has assignment of the water licence been completed? As you know a water Licence is required for these activities. Please provide an update on the status of the assignment.

I request a submission of a work plan for the 2013 field season; A short summary of actionable items within the A and R plan and implementation schedule. This will ensure I schedule a final inspection after the work is done onsite and enable me to close this licence promptly following the inspection season pending the findings of the inspection.

Feel free to contact me at anytime so that I may assist this process. We appreciate the time

you have taken to meet the requirements.

Tracey,

As discussed, please see the enclosed letter with attachments, regarding Mega's plan for the cleanup of the Itza Lake camp site, Nunavut.

Should you have any questions please feel free to contact Mike McNeill or myself.

Regards

Michael
