**Subject:** Titan uranium Inc. 2008 field activities. Permit N2005C0040  
**Attachments:** Interim Report-2008.pdf

Attached please find the Titan Uranium Inc. Interim Report of 2008 summer field activities. The final reports will be submitted once the assay results have been received.

Please note that the camp is on winter stand by, all tents have the doors screwed shut, stove pipes removed and the fuel to stoves shut off. The fuel insta-berms are equipped with oil absorbent filtered drains to ensure that excess water is not held in these berms. The drum that was leaking during the July 22<sup>nd</sup> 2008 inspection was located and removed from site to Baker Lake for disposal. The oil on the water in the berm was removed as described in the inspection report and also by oil absorbent matting. All of this material was incinerated at high temperature as requested in the report.

Also, it has been indicated several times that **8 Albert Street, Stouffville, Ontario** is not the address of Titan Uranium Inc but rather the address of Mr. Paul Nicholls who has acted on Titan's behalf in the past. The Titan Uranium Inc. address is **Suite 100-2100 Airport Drive Saskatoon, SK, S7L 6M6**. Information sent to the Albert Street address takes much longer to get to us as Mr. Nicholls has several other clients and is not always at his address to redirect information to us. In future please send all written information to the Saskatoon address. Thank you.

Regards,

John A. Dixon MA, P. Geo.
