Material Safety Data Sheet

Product Name	JET A/A-1 AVIATION TURBINE FUEL	Code	W213 SAP: 149
Synonym	Jet A-1; Jet A-1-DI; Aviation Turbine Kerosene (ATK); JP-8; NATO F-34; Jet F-34; Turbine Fuel, Aviation, Kerosene Type (CAN/CGSB-3.23)	Validated o	n 8/17/2001.
Manufacturer	PETRO-CANADA P.O. Box 2844 Calgary, Alberta T2P 3E3		Petro-Canada: 403-296-3000 Canutec Transportation: 613-996-6666 Poison Control Centre: Consult
Material Uses	Use as aviation turbine fuel. May contain a fuel system icing inhibitor. In the arctic, Jet A-1 may also be used as diesel fuel and heating oil.		local telephone directory for emergency number(s).

				Ex		
	Name	CAS#	% (V/V)	TLV-TWA(8 h)	STEL	CEILING
Aromatic content is 2	petroleum hydrocarbons (C9-C16) 5% maximum (benzene: nil). nhibitor (FSII) (if added*):	8008-20-6	99.9	Not established	Not established	Not established
Diethylene Glycol Monomethyl Ether		111-77-3	≤0.15	Not established	Not established	Not established
Anti-static, antioxidant and metal deactivator additives.		Not applicable	<0.1	Not applicable	Not applicable	Not applicable
* Please note that Jet F-34 all contain Fuel S	A-1-DI, JP-8, Jet F-34 and NATO System Icing Inhibitor.					
Manufacturer Recommendation	Not applicable					
Other Exposure Limits	Consult local, state, provincial or t	erritory authoritie	es for accept	able exposure limits.		

Section 3. Haza	Section 3. Hazards Identification.		
Potential Health Effects	Eye contact can cause mild irritation. Skin contact can cause moderate to severe irritation. Inhalation of vapours can cause irritation of the respiratory tract and CNS depression with symptoms of nausea, headaches, vomiting, dizziness, fatigue, light-headedness, reduced coordination, unconciousness and possibly death. Aspiration into the lungs may produce potentially fatal chemical pneumonitis (fluid in the lungs), severe lung damage, or respiratory failure. For more information, refer to Section 11.		

Section 4. First Aid Measures			
Eye Contact	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention.		
Skin Contact	Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention.		
Inhalation	Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention.		
Ingestion	DO NOT induce vomiting because of danger of aspirating liquid into lungs. Seek medical attention.		
Note to Physician	Not available		

Flammability	Class II - combustible liquid (NFPA).	Flammable Limits	LOWER: 0.7% UPPER: 5%
Flash Points	CLOSED CUP: >38°C (100°F) Tag (ASTM D56)	Auto-Ignition Temperature	210°C (410°F)
Fire Hazards in Presence of Various Substances	Flammable in presence of open flames, sparks, or heat. Vapours are heavier than air and may travel considerable distance to sources of ignition and flash back. This product can accumulate static charge and ignite. May accumulate in confined spaces.		Do not cut, weld, heat, drill or pressurize empty container. Containers may explode in heat of fire

JET A/A-1 AVIATION	TURBINE FUEL Page Number: 2
Products of Combustion	Carbon oxides (CO, CO2), nitrogen oxides (NOx), sulphur oxides (SOx), smoke and irritating vapours as products of incomplete combustion.
Fire Fighting Media and Instructions	NAERG96, GUIDE 128, Flammable liquids (Non-polar/Water-immiscible). CAUTION: This product has a very low flash point: Use of water spray when fighting fire may be inefficient.
	If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also consider initial evacuation for 800 meters (1/2 mile) in all directions.
	SMALL FIRES: Dry chemical, CO2, water spray or regular foam. LARGE FIRES: Water spray, fog or regular foam. Do not use straight streams. Move containers from fire area if you can do it without risk.
	Fires Involving Tanks or Car/Trailer Loads: Fight fire from maximum distance or use unmanned hose holders or monitor nozzles
	Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting devices or any discolouration of tank. ALWAYS stay away from the ends of tanks. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible withdraw from area and let fire burn. Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.

Material Release or Spill NAERG96, GUIDE 128, Flammable Liquids (Non-polar/ Water-immiscible). ELIMINATE ALL IGNITION SOURCES. Avoid contact. Stop leak if without risk. Contain spill. Absorb with inert absorbents, dry clay, or diatomaceous earth. Avoid inhaling dust of diatomaceous earth for it may contain silica in very fine particle size, making this a potential respiratory hazard. Place used absorbent in closed metal containers for later disposal or burn absorbent in a suitable combustion chamber. DO NOT FLUSH TO SEWERS, STREAMS OR OTHER BODIES OF WATER. Check with applicable jurisdiction for specific disposal requirements of spilled material and empty containers. Notify the appropriate authorities immediately.

Handling	Keep away from heat. Keep away from sources of ignition. Empty containers pose a fire risk. DO NOT reuse empty containers without commercial cleaning or reconditioning. Ground/bond line and equipment during pumping or transfer to avoid accumulation of static charge. DO NOT ingest. Do not breathe gas/vapor/spray. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately. Avoid contact with skin and eyes. Practice good personal hygiene. Wash hands after handling and before eating. Launder work clothes frequently. Discard saturated leather goods.
Storage	Store in tightly closed containers in cool, dry, isolated, well-ventilated area, and away from incompatibles. Ground all equipment containing material.

	re Controls/Personal Protection
Engineering Controls	For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station.
Personal Protection Eyes	The selection of personal protective equipment varies, depending upon conditions of use. Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. If product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered.
Body	Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn.
Respiratory	Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to your area) and where engineering, work practices or other means of exposure reduction are not adequate, NIOSH approved respirators may be necessary to prevent overexposure by inhalation.
Hands	Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated.
Feet	Wear appropriate footwear to prevent product from coming in contact with feet and skin.

Physical State and Appearance	Clear liquid.	Viscosity	1.0-1.9 cSt @ 40°C (104°F)
Colour	Colourless.	Pour Point	<-51°C (-60°F)
Odour	Kerosene-like.	Softening Point	Not applicable.
Odour Threshold	Not available	Dropping Point	Not applicable.
Boiling Point	150 to 300°C (302 to 572°F)	Penetration	Not applicable.
Density	0.8 to 0.82 kg/L @ 15°C (59°F).	Oil / Water Dist. Coefficient	Not available
Vapour Density	4.5 (Air = 1)	Ionicity (in water)	Not available
Vapour Pressure	0.70 kPa @ 20°C (5.25 mmHg @ 68°F).	Dispersion Properties	Not available

JET A/A-1 AVIATION TURBINE FUEL		Page Number: 3	
Volatility	Lower than gasoline.	Solubility	Insoluble in water. Partially miscible in some alcohols. Miscible with other petroleum solvents.

Section 10. Stabil	Section 10. Stability and Reactivity			
Corrosivity	Not available			
Stability	The product is stable under normal handling and storage conditions.	Hazardous Polymerization	Will not occur under normal working conditions.	
Incompatible Substances / Conditions to Avoid	Reactive with oxidizing agents.	Decomposition Products	May release COx, NOx, SOx, smoke and irritating vapours when heated to decomposition.	

Routes of Entry	Skin contact, eye contact, inhalation, and ingestion.			
Acute Lethality	Acute oral toxicity (LD50): >20000 mg/kg (rat). Acute dermal toxicity (LD50): >5000 mg/kg (rabbit). Acute inhalation toxicity (LC50): >5000 mg/m³/4h (rat).			
	Diethylene Glycol Monomethyl Ether Acute oral toxicity (LD50): 4140-5180 mg/kg (rat). Acute dermal toxicity (LD50): >2000 mg/kg (rabbit). Acute inhalation toxicity (LC50): >50000 mg/m³/4h (rat).			
Chronic or Other Toxic Effects Dermal Route:	Skin contact can cause moderate to severe irritation.			
Inhalation Route:	Inhalation of vapours can cause irritation of the respiratory tract and CNS depression with symptoms o nausea, headaches, vomiting, dizziness, fatigue, light-headedness, reduced coordination, unconciousness and possibly death.			
Oral Route:	Aspiration into the lungs may produce potentially fatal chemical pneumonitis (fluid in the lungs), severe lung damage, or respiratory failure.			
Eye Irritation/Inflammation:	Eye contact can cause mild irritation.			
Immunotoxicity:	Not available			
Skin Sensitization:	This product is not expected to be a skin sensitizer, based on the available data and the known hazard components.			
Respiratory Tract Sensitization	This product is not expected to be a respiratory tract sensitizer, based on the available data and the hazards of the components.			
Mutagenic: This product is not expected to be a mutagen, based on the available data and the k components.				
Reproductive Toxicity:	This product is not expected to be a reproductive hazard, based on the available data and the known hazard of the components.			
Teratogenicity/Embryotoxicity	Fetotoxicity, embryotoxicity and/or teratogenicity have been observed in rats or rabbits following oral or derma administration, in the absence of maternal toxicity. [Diethylene Glycol Monomethyl Ether]			
Carcinogenicity (ACGIH)	This product is not known to contain any chemicals at reportable quantities that are listed as A1, A2 or A3 carcinogens by ACGIH.			
Carcinogenicity (IARC):	IARC Group 3: Not classifiable as a human carcinogen.			
Carcinogenicity (NTP):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP.			
Carcinogenicity (IRIS):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by IRIS.			
Carcinogenicity (OSHA):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by OSHA.			
Other Considerations	No additional remark.			

Environmental Fate	Not available	Persistance/ Bioaccumulation Potential	Not available	
BOD5 and COD	Not available	Products of Biodegradation	Not available

Section 13. Disposal Considerations

Waste Disposal

Preferred waste management priorities are: (1) recycle or reprocess; (2) incineration with energy recovery; (3) disposal at licensed waste disposal facility. Ensure that disposal or reprocessing is in compliance with government requirements and local disposal regulations. Consult your local or regional authorities.

Section 14. Transport Information

TDG Classification

Currently: Fuel, aviation, turbine engine, 3,

UN1863, PGIII

As of August 15, 2002: FUEL, AVIATION.

TURBINE ENGINE, 3, UN1863, PGIII

Special Provisions

Not applicable.

for Transport

Section 15. Regulatory Information

Other Regulations This product is acceptable for use under the provisions of WHMIS-CPR. All components of this formulation are listed on

the CEPA-DSL (Domestic Substances List)

All components of this formulation are listed on the US EPA-TSCA Inventory.

All components of this product are on the European Inventory of Existing Commercial Chemical Substances (EINECS).

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR

Please contact Product Safety for more information.

The WHMIS classification of Jet A/A-1 is B3, D2B.

The WHMIS classification of Jet A/A-1-DI, JP-8, Jet F-34 and NATO F-34, which all contain FSII (Diethylene Glycol

Monomethyl Ether), is B3, D2A, D2B.

DSD/DPD (Europe)
