Subject: Re: 090817 2BE-TOR----, New Application North Arrow Minerals Inc. - Request for review and comments - Kitikmeot Region
Date: Sunday, August 23, 2009 11:15:11 AM

Hello my comment on this is that on page 4, it indicates that low level flying will occur only for supply and crew changes. The company should be prepared to commit to low level flying only when necessary because it disturbs wildlife. Only doing what you would do anyway doesn't really strike me as a "mitigation measure" unless I'm missing something. I can't understand from the application what it is or where it is, I know they give a lat/long but there is no project description or map and it is a bit confusing. Are they inside the Kitikmeot land use plan? Is it for radioactive material or other minerals?

Thank you,

Alice Baker.
