

## REMEDIATION PLAN

**For:** Golden Bull Resources Corp. Walker Lake Camp and Ten (10) Mineral Properties, Committee Bay Area, Nunavut.

**Submitted:** June 18, 2007.

To accompany the INAC/KIA land use permit application by:

**Golden Bull Resources Corporation,**  
Level 8, 580 St Kilda Road,  
P.O. Box 6315,  
St Kilda Road Central,  
Melbourne Victoria 8008,  
Australia

Telephone: +61-3-8532-2860  
Facsimile: +61-3-8532-2805

The program will be supervised by Bruce Goad, P. Geo. (the company's Canadian representative and geological consultant). My contact information is as follows:

**Inukshuk Exploration Inc.,**  
21861 44 A Avenue,  
Langley, British Columbia.  
CANADA V3A 8E1

Telephone: +1-604-533-2255  
E-mail: inukshuk@uniserve.com

The Walker Lake camp is located at 66°47'59" N and 90°42'46" W, on an island at the north end of Walker Lake. An esker is located on the island that can be used as a landing strip. The camp is a winterized canvas tent camp with wooden tent floors and sides for approximately 11 tents (7 for sleeping, 1 for core logging, a dry, a kitchen and an office).

**The camp will not be used this season but we want to keep the site and permit in good standing for planned use (drilling) next year (2008).** (A new permit application to cover this program will be submitted in early 2008.)

This site was previously used by Natural Resources Canada (Nunavut) in 2001 for a camp and subsequently in 2004 by Bay Resources Ltd. and 4075251 Canada Inc. (precursor companies to Golden Bull Resources Corp.).

The camp is located 245 to 365 kilometres northeast of the town of Baker Lake (Qamani'tuaq), Nunavut, or 210 to 320 kilometres west to southwest of the town of Repulse Bay (Naujat). The community of Kagaaruk (formerly Pelly Bay) is 190 to 305 kilometres northeast, while Sila Lodge, located on Wager Bay is approximately 150 kilometres southeast.

At the end of the 2004 season, the camp was de-mobed and all waste material was incinerated and/or removed back to Baker Lake. Currently, wooden tent frames remain on site, as they will be used during the company's proposed 2008 exploration program. This camp will be entirely dismantled at the end of the planned 2008 exploration

(drilling) program; at this point all materials (including tent frames) will be removed from the camp site (for re-use elsewhere or for appropriate disposal). To date there has been no disruption on the company's mineral claims to restore. Any areas of the Walker Lake campsite disturbed during the 2008 exploration program (including grey water sump and burn pit) will be covered and graded. All 2008 drill sites will be reclaimed to their natural state.
