Subject: NWB2NTI0305 Renewal and NWB2WLS0406 Amendment

Good Afternoon Phyllis,

Just a quick note (in line with my usual habit of making a pest of myself) inquiring into the status of two applications submitted to you a while back.

The first is an application for the renewal of NWB2NTI0305 which expires July 25, 2005. I know that there are still a few weeks to go before the license does actually expire, however I just wanted to check in and insure that everything was on track for the renewal.

The second submission is a request for an amendment to license NWB2WLS0406, an existing license, valid until 2006. In this application Strongbow has asked to include camp facilities to the scope of activities currently authorized under the existing license. On the application the exploration program is listed as having a start date of August, so in keeping with this timeline, I thought that I should maybe check in and see if there was any additional information that the Board would be requesting in order to approve and issue this amendment.

If you could let me know the status of these applications, or if need be, point me in the direction of the tech person who I should be harassing instead, I would really appreciate it.

Thank you very much Phyllis !

Best Regards,

Nicole Westcott

Thank you for the amendment documents. I've received the originals today and the only thing missing to commence the review is the project summary in Inuktitut. Once received I will begin processing your request

Subject: Amendment to NWB2WLS0406 - add remote camp

We acknowledge receipt on April 6, 2005 of your request for amendment to your water license. In order to commence the review we require your project summary in Inuktitut. Also, have you determined yet where your camp will be located? There may be a problem with the review considering you have 4 possible locations covering quite an area.

Thanks Nicole. I thought I should mention that we've not received the original documents which would have had the 30.00 cheque enclosed for the amendment. Perhaps you can check on this for me.

Good Afternoon Phyllis,

Attached please find the completed Inuktitut translation for the summary that is to accompany the application to amend NWB2WLS0406, and add a camp to the activities already authorized under this license. I believe that the submission of the translation now completes our application.

Also attached is a letter clarifying which of the four coordinates listed as possible camp locations on the original amendment application has since been determined to be the most likely location for the proposed camp.

A paper copy of the summary accompanied by the signed original of the attached letter will follow by mail.

I would like to thank you again for all of your assistance. If you have any questions in regards to this submission or the amendment application please contact me at your convenience.

Best Regards,
