**Re: Licence Amendment No. 1 – NWB2WLS0406 Type “B”
Revision of Spill Plan and Abandonment and Restoration Plan**

Dear Ms. Beaulieu,

As per the terms and conditions attached to Amendment 1 (issued July 4, 2005) of the above referenced Type “B” water license, on July 28, 2005 revised copies of the Spill Contingency Plan and the Abandonment and Restoration Plan for the 2005 Wales Island Program were submitted to the Nunavut Water Board accompanied by a letter explaining that portions of each of the respective plans could not be completed as requested at that time as the camp facilities for the project had not yet been constructed and therefore certain details (i.e. camp structure, fuel and chemical storage locations, etc.) had not been established.

Since that submission camp facilities for the Wales Island Project have been constructed and each of the respective plans has been updated to include the information that had not yet been determined. Copies of the newly revised Spill Contingency Plan and Abandonment and Restoration Plan are enclosed.

If you have any questions or comments regarding the revisions made to these documents please contact the undersigned at your convenience.

Yours truly,
STRONGBOW EXPLORATION INC.
