Government of Nunavut

Iqaluit, NU 867-975-7769

To whom it may concern,

I am writing to you in regards to the 2BM-ULU2030 Project. Recently, the Government of Nunavut was asked if there were any issues with the beneficial use of PHC contaminated soil as landfill cover. We appreciate that the proponent had clarified with the Department beforehand.

The Department does not have any issues with this soil being used as landfill cover, as long as it is within the CCME soil quality guidelines.

If there are any questions or concerns please feel free to contact me with the information below.

Regards,

Sean Noble-Nowdluk Environmental Protection Officer
