Dear Dave:

Re: Your Letter Dated March 15, 2005

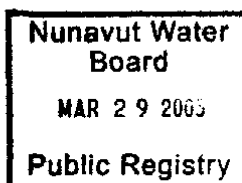

In regard to your letter indicated in the above I would like to apologize for not being able to provide you with the pH, temperature and specific conductivity readings of the water samples collected in 2004. I do not have flow measurements either for Station 200-4. At the time I was not aware we were required to take these measurements. I am currently in the process of costing a ~~pH, temperature, specific conductivity and water flow meter~~ so that we will be in compliance with the SNP in 2005 and beyond.

Enclosed for your review and approval is a copy of Wolfden's report titled "Revised SNP Quality Assurance/Quality Control Requirements for Surface Water Samples" as per Section B, Item 4 of the SNP requirements.

I will be submitting a copy of the Annual Report for the Ulu Project to the NWB either today or tomorrow.

Regards,

David B. Stevenson, M.Sc., P.Geo.
Project Manager, Ulu

cc Philippe di Pizzo, NWB
