Re: Application for Water Use and Waste Disposal Without License

Dear Ms. Beaulieu,

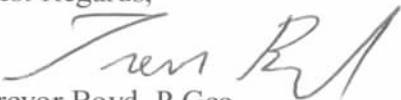

We have been in the process of preparing the documentation for the Assignment of the Water Use License (which is Starfield Resource's submitted application for renewal) for the Ferguson Lake Project in the name of the new owners of the project, Canadian North Resources and Development Corp. That application with the supporting documentation has now been couriered to your office.

This is a request for special permission for approval to use water and deposit waste without a license at the Ferguson Lake Property camp. We request to open the camp for about two weeks during August in order to complete necessary maintenance procedures as part of our "duty to care" of the facility and surroundings, as it is situated on KIA surface lands. Specifically, these procedures include

1. Maintenance and repair of site building and mechanized equipment
2. Re-grading of landing strip for safety reasons
3. Independent sampling and analysis of waters in fuel storage area sump by Rescan Environmental to confirm no leakage of hydrocarbons (note: the sump is underlain by an impermeable layer).

Please feel free to email (boyd3@sympatico.ca) or call (416 919 9017) with questions and/or concerns.

Best Regards,

Trevor Boyd, P.Geo.
Canadian North Resources and Development Corp.
