TITLE: Landscape Hazard Mapping.

OBJECTIVES OF RESEARCH:

The purpose of this project is to create a map that shows where the community lands in Arviat are changing, particularly where those changes may affect how land is being used now or in the future. Many of these changes in the landscape are occurring because of changes in climate. For example, warmer temperatures cause the frozen ground to thaw, making it more challenging to build on. Less sea ice and more wind cause greater wave action and erosion of the community shoreline, potentially impacting buildings and structures along the coast. This map will be useful for the hamlet council, community members and the Government of Nunavut in making decisions about the current and future land use planning.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

DATA COLLECTION IN NU:

DATES: September 01, 2016-July 31, 2016

LOCATION: Arviat

Scientific Research License 03 015 15R-M expires on December 31, 2015

Issued at Iqaluit, NU on August 27, 2015
