Good Morning Nick, will you be conducting a study on Chesterfield similar to the one on Baker Lake? I am also interested in timelines for any additional information that may come in. Also will you be involved with the proposed road to Josephine Lake?

For your information I have included a list of what the water board is looking for pertaining to road construction:

1. Evidence of an application for a Land Use Permit from the Kivalliq Inuit Association if on Inuit Owned Land.
2. Evidence of an application for a Land Use Permit from Indian and Northern Affairs if crossing Crown Land.
3. A Culvert Bridge Questionnaire (previously e-mailed) will be required as the road will likely cross Josephine River which contains migratory Arctic Char.
4. A detailed map of the proposed road route including topography and adjacent water bodies.
5. 90% Complete signed and stamped engineering diagrams for any bridges along the proposed road to Josephine Lake.

For your information the application may be forwarded to NIRB for a screening decision as the proposed undertaking may have an impact outside the hamlet boundaries. I understand that procuring the following may take some time and feel free to call or email out any questions or issues. Thanks Nick,

Don
