Good Morning Richard,

Apologies for the late reply. ECCC considers our technical review complete for the Hamlet of Coral Harbour - Type A Water License Application. The NWB may proceed with the process and plan the next stages.

Regards,

Jennifer Sabourin

Subject: Re: Hamlet of Coral Harbour New Type "A" water licence application

Good morning Jennifer,

Just a reminder could ECCC confirm the application package is complete for a Type "A" renewal licence?

- If yes, whether the review completed by Interveners could be considered as a full technical review, and the NWB could plan next stages, including a Technical Meeting, or the Interveners require an additional technical review?

- If no, what additional information the Interveners require to consider the application package as a complete application for a Type "A" licensing.

Thanks,

Richard

Good afternoon John and Jennifer,

In addition to what Richard was asking, the NWB would like to get CIRNA and ECCC positions on whether the application package could be considered complete for a Type "A" renewal licence?

- If yes, whether the review completed by Interveners could be considered as a full technical review, and the NWB could plan next stages, including a Technical Meeting, or the Interveners require an additional technical review?

- If no, what additional information the Interveners require to consider the application package as a complete application for a Type "A" licensing.

Thank you,

Ok Guys, maybe this was my mistake, didn't give a full advise at this time, but this question was supposed to go directly to parties that provided comments not necessarily to the full distribution.

Ali, i will appreciate if you could send me the contact info of CIRNA and ECCC reviewers.

Good afternoon,

The Nunavut Water Board has noticed that the comments received during the Completeness Check for the Hamlet of Coral Harbour New Type "A" water licence application were of technical nature. The Board wishes to confirm with the interveners whether they require an additional Technical Review period (as per the Type A process). If not, then the Board will consider the comments and responses received till date as Technical Review and move on to the next stage of the process without an additional Technical Review.

The NWB requests a response from parties by November 16 end of the day.

Regards,

Richard
