RE: NWB Application for disposal of blast rock to the northwestern side of the lake, east of the arena.

Dear Mr. Ningeongan:

With respect to your application filed on January 26, 1999, for disposal of blast rock to the northwestern side of the lake, east of the arena, the NWB requires additional information prior to making a final decision. It may not be appropriate to cover this area with blast rock prior to testing, particularly if the area is to be developed for residential purposes. Further assessment of the levels, types and quantity of contaminants and waste present at this old waste disposal site is required to ensure that long term environmental impact are not created. The NWB also requires confirmation that the blast rock to be used as cover material is non-sulphide bearing.

Should you require clarification please do not hesitate to contact me.

Sincerely,

Dionne Filiatrault
Technical Advisor
