Re: Hamlet of Rankin Inlet

The original application for a water licence was filed by the Hamlet of Rankin Inlet on November 30, 2001. An initial technical review of the application noted several deficiencies in the information provided, which were addressed by the provision of additional information by the Hamlet. This information was sent to the Distribution List for review on July 8, 2002, with the Nunavut Water Board requesting written comments and concerns with the project before August 5, 2002.

Based on the review of the comments and concerns, it was noted that the issue of the operation of Water Treatment and Sewage Treatment Facilities in Rankin Inlet by the Department of Public Works and Services (Government of Nunavut) prevented the issuance of a water licence to the Hamlet of Rankin Inlet for the operation of these Facilities. It was determined that the most appropriate action was to issue a water licence to the Hamlet of Rankin Inlet for the operation of the Solid Waste Disposal Facility, while the Department of Public Works and Services would be licensed for the operation of the Water Treatment and Sewage Treatment Facilities, on behalf of the Government of Nunavut.

Applications reflective of this division of activities have been received from both the Hamlet of Rankin Inlet and the Department of Public Works and Services. Notice of these administrative changes will be posted with local organizations in Rankin Inlet. As the technical information previously reviewed remains unchanged, the Nunavut Water Board is accepting written concerns and comments on these applications until December 6, 2002. If any additional information is required on these applications, please contact the undersigned at (867) 360-6338 or <a href="mailto:nwbtech@polarnet.ca">nwbtech@polarnet.ca</a>.

Sincerely, *Original signed by:* 

Jim Wall Technical Advisor
