Hi Damian,

We have not yet been provided with the DFO presentation or with the hearing transcripts. The DFO presentation was basically just an outline of Julie Dahl's comments with much more detail provided in what she said. I would like to have both of these before we respond.

As well both of the fish biologists I have had involved in this project are out of the office and unavailable this week. They are on vacation - one is out of the country and the other is in southern Canada somewhere (not sure exactly).

Given the above, having a response to the DFO comments back to the Board by this Friday is not going to be possible. Please provide the documents that we require and I will get one of the bios on this ASAP next week.

Thanks,

**Joe Acorn, M.A.Sc, P.Eng.**
