Hi Megan,

As you are aware the Rankin Inlet Type A Licence full renewal application was for the public review/comments regarding the completeness of application and initial technical review.

And the NWB received comments from AANDC and EC that require clarifications/additional information. The additional information requirement is related more specifically to the monitoring data and updated Sewage Treatment Facility O&M and Environmental Monitoring Program and QA/QC Plans that were supposed to be submitted to the Board in April 17th. I believe Parties (the NWB as well) were looking for this information during the review.

You will see that some comments could be discussed during the full technical review / technical meeting stage.

I am attaching the comments for your information. It would be appreciated If you could provide clarifications/responses directly to the Intervenor and to the Board by the end of week, in May 15th.
