Hi Megan!

I've recently been assigned to the NWB regulator review of Water Licence Amendment Application 3AM-GRA1624. I've had a quick look at the information that you've provided and would like to request further information related to the General Water Licence Application form Block 11, 23, and 24.

Block 11

Block 11 requires that *information in accordance with applicable Supplemental Information Guidelines (SIG) must be updated and submitted with an Application for Amendment*. On the form you have indicated, in Block 11, that the following SIG are applicable to the project:

- Municipal

The Municipal SIG was not submitted with the application package.

Please provide an updated Municipal SIG or a justification for not providing one.

Block 23

Block 23 requires that project proponents *Provide a compliance assessment and status report including a response to any inspector's reports*. No compliance assessment was provided with the application. The Municipal SIG, on line 57 of tab 3 (General Water Licence App), provides additional discussion of what should be included in a compliance assessment.

Please provide a compliance assessment.

In keeping with the compliance assessment request related to Block 23 of the form, please provide copies of the 2016 and 2017 annual reports.

Block 24

On the form you have indicated, in Block 24, that the intended construction start for the Project is May 2018. The Amendment Application was submitted to the NWB on February 2018. The typical timeline for a Type "A" amendment, including public hearing, is approximately nine (9) months. Thus, based on the submission date, it is likely that this amendment could be approved in November rather than in May.

Please provide a discussion of your anticipated construction timeline as it relates to the typical regulatory timeline.

Regards,

Dave Baines MSc EP
