Subject: Water Licence Application-Hamlet of Igloolik

Please find attached an application for water licencing forwarded to me by the Hamlet of Igloolik.

Expansion of the water reservoir and sewage lagoon are planned as part of the Incremental Infrastructure Plan for communities that will become regional headquarters for GNWT departments. Drawings of these facilities would be available upon completion of the project. At the present time we have little to offer in the way of drawings for either the lagoon or reservoir.

The following are included with the application;

- Nunavut Land Transfer drawing showing reservoir boundary
- Incremental Infrastructure Project list for Igloolik and briefing notes for sanitation projects
- DIAND's-1995 test results for reservoir water and for effluent from the lagoon
- Northwest Territories Water Quality Study for Igloolik-1991
- Information on Igloolik and the water system
- Aerial photos showing locations of sanitation, water and fuel facilities in the municipality of Igloolik(2)
- map of reservoir, airport, tank farm area by MACA Surveys & Mapping

If I can be of further assistance please contact me at 819-979-5020. MACA is forwarding this application on behalf of the Hamlet of Igloolik at their request.

Yours Sincerely,

Rick Armstrong

Capital Program Officer/MACA
