● **Comments:**

As per our conversation yesterday and as per your request we are making the following improvements to our sewage disposal system.

- 1) Transferring sewer by means of a portable pump and sewage trucks from cell # 2 and cell # 3 into cell # 1 which has the best seepage.. This is being done in order to lower fluid levels in cell 2 and cell 3 which don't drain properly.
- 2) Building a reserve lagoon 66 meters wide X 41 meters long and 3.7 meters deep.

The volume of our three cell sewage lagoon was barely enough to hold last winter's sewage so I thought it was necessary to make the above mentioned improvements...

Regards
