Good Afternoon,

Environment Climate Change Canada (ECCC)'s original technical comments submitted to the Nunavut Water Board (NUB) on March 20, 2020 addressed gaps in the Government of Nunavut, Community and Government Services (the proponent) reporting program. Unfortunately, the proponents responses were not sufficient to address out technical comments. However, these concerns should be resolved before or when monitoring is properly implemented in future years.

ECCC will therefore not be providing further comments or be participating further in the water licencing process for 3AM-IGL---- *unless the NWB expressly requests us to do so*. ECCC anticipates that we will review and provide technical comment on the proponent's annual reports and other documents related to thus licence, if and when the licence is issued.

Regards,

Eva
