Sub: Commissioning of the Igloolik Sewage Lagoons

Dear Mr. Monteith,

I would like to inform you that the Cell 1 new sewage lagoon in Igloolik was built and commissioned in 2018. The existing three cells lagoon have been rehabilitated with impervious liner and converted into two cells lagoon. All the cells are now in containment nature.

Since the Cell- 1 is almost full, Hamlet is planning to use cell-2 and later on cell 3 as needed.

During the operation, Hamlet will be following the conditions of their water licence and instructions of the operational technology of the Operation and Maintenance Manual provided by the Consultant following the as built drawings of these facilities.

Please contact if you have any other advice or direction.

Thanks.

BE. Long
